Thank you for the notification, Keld.

I concur with the Type B site designation as all current PCB detections are below 1 mg/kg. Please contact us should > 50 ppm PCB be discovered at this facility.

Thanks,

Peter:

The required EPA notification for a PCB contaminated site is attached for your use.

RP letters are viewable via the link below from our database (BRRS on the Web):

<https://dnr.wi.gov/botw/GetActivityDetail.do?adn=0205551641&crumb=0>

Only one soil sample out of 25 samples collected showed a detection of PCBs at 0.061 ppm. Let me know if you would like me to send you all the available analytical results as they are not currently uploaded to our database.

Let me know if you have any questions or concerns.

Thanks,

-Keld
