Subject: Soil Vapor Extraction and Monitoring Well Network Modification Work Plan: Madison Kipp Company (MKC)

Dear Ms Vater:

The Department has reviewed and approves the planned approach to shutdown of the SVE system operating at the MKC Waubesa Street facility. Upon initial shutdown and completion of the monthly sampling from October to December 2018 a final decision will be made concerning continued soil vapor sampling and the future need for the remedial system. The ongoing operation or removal of the system will be based on the decision making outlined in the two scenarios included in Section 4 of the work plan.

The Department also approves the abandonment of well MW-21D2 as recommended.

If you have questions about this approval, please contact me directly.

Sincerely

A handwritten signature in blue ink that reads 'R. Michael Schmoller'.
