Subject: Closure of WDNR LUST Case #05-1043
Procter & Gamble - Fox River Plant, 501 Eastman Ave., Green Bay

Dear Mr. Zabor:

The Department's Case Closeout Committee in the Lake Michigan District has completed a review of the above referenced petroleum contamination case. This panel reviews environmental remediation cases for compliance with state laws, standards, and guidelines to maintain consistency in the closeout of cases. It appears that actions have been taken to the extent practicable to restore the environment and minimize the harmful effects from this discharge to the air, lands and waters of this state.

Based on the information available, the Department is not requiring any further investigation or other action concerning this specific site. However, if additional information in the future indicates that further investigation or cleanup is warranted, the Department will require that appropriate action be taken at that time.

The Department appreciates the actions you have undertaken to restore the environment at this site. If you have any questions, please do not hesitate to contact me at (414) 492-5942.

You should note that this letter does not constitute Department "certification" under s. 144.765 (2) (a) 3, Stats., as created by 1993 Wisconsin Act 453 (May 12, 1994). Persons who meet the definition of "purchaser" in s. 144.765 (1) (c) must receive Department pre-approval prior to conducting a site investigation in order to be eligible for the liability exemption under s. 144.765, Stats.

Sincerely,

Ashley Kimbell, Program Assistant
