Management Report Number 66

December, 1973

A Numerical Summary and Alphabetical Listing of Lakes and Streams in the Southeast District of Wisconsin

Richard R. Cornelius
Staff Specialist

A NUMERICAL SUMMARY AND ALPHABETICAL LISTING OF LAKES AND STREAMS IN THE SOUTHEAST DISTRICT OF WISCONSIN

Introduction

Since 1959 the Department of Natural Resources has been involved in a comprehensive survey of all the waters in Wisconsin. Data have been compiled on a county-by-county basis, and have been summarized in surface water resources publications for each county. Using these data, a numerical summary and alphabetical listing of the lakes and streams in the Southeast District of Wisconsin has been compiled. Some data were gathered as early as 1959, and therefore may be somewhat outdated. More detailed information on any of the lakes or streams listed in this report may be found in the appropriate county surface water resources report.

Results

The Southeast District is composed of seven counties in southeastern Wisconsin (Figure 1). These counties are Kenosha, Milwaukee, Ozaukee, Racine, Walworth, Washington and Waukesha.

The total surface area of the Southeast District is 41,617 acres.[1] There are a total of 327 natural lakes and impoundments making up 37,528 acres of surface water area. There are also 161 streams with 4,088.2 acres of surface water area and totaling 1,013.0 miles in length.[2] Of these, only 4 are classed as trout streams with a total length of 13.5 miles.

There are 279 natural lakes and 48 impoundments in the Southeast District. Impoundments provide only 4.0 percent of the total lake surface area. Forty percent (130) of the lakes are under 10 acres, while 2 percent (8) are 1,000 acres or larger. However, lakes under 10 acres provide only one percent of total lake surface water acreage, while lakes greater than 1,000 acres provide 43 percent. Size classes of lakes and impoundments are summarized in Table 1. The largest lake in the Southeast District is Lake Geneva with a surface area of 5,104 acres. Pewaukee Lake is second in size at 2,359 acres. Lake Michigan borders the Southeast District on the east.

[1] These figures exclude Lake Michigan.

[2] Data for the unnamed streams in Waukesha County was unavailable at the time of writing.

Figure 1. Southeast District Boundaries

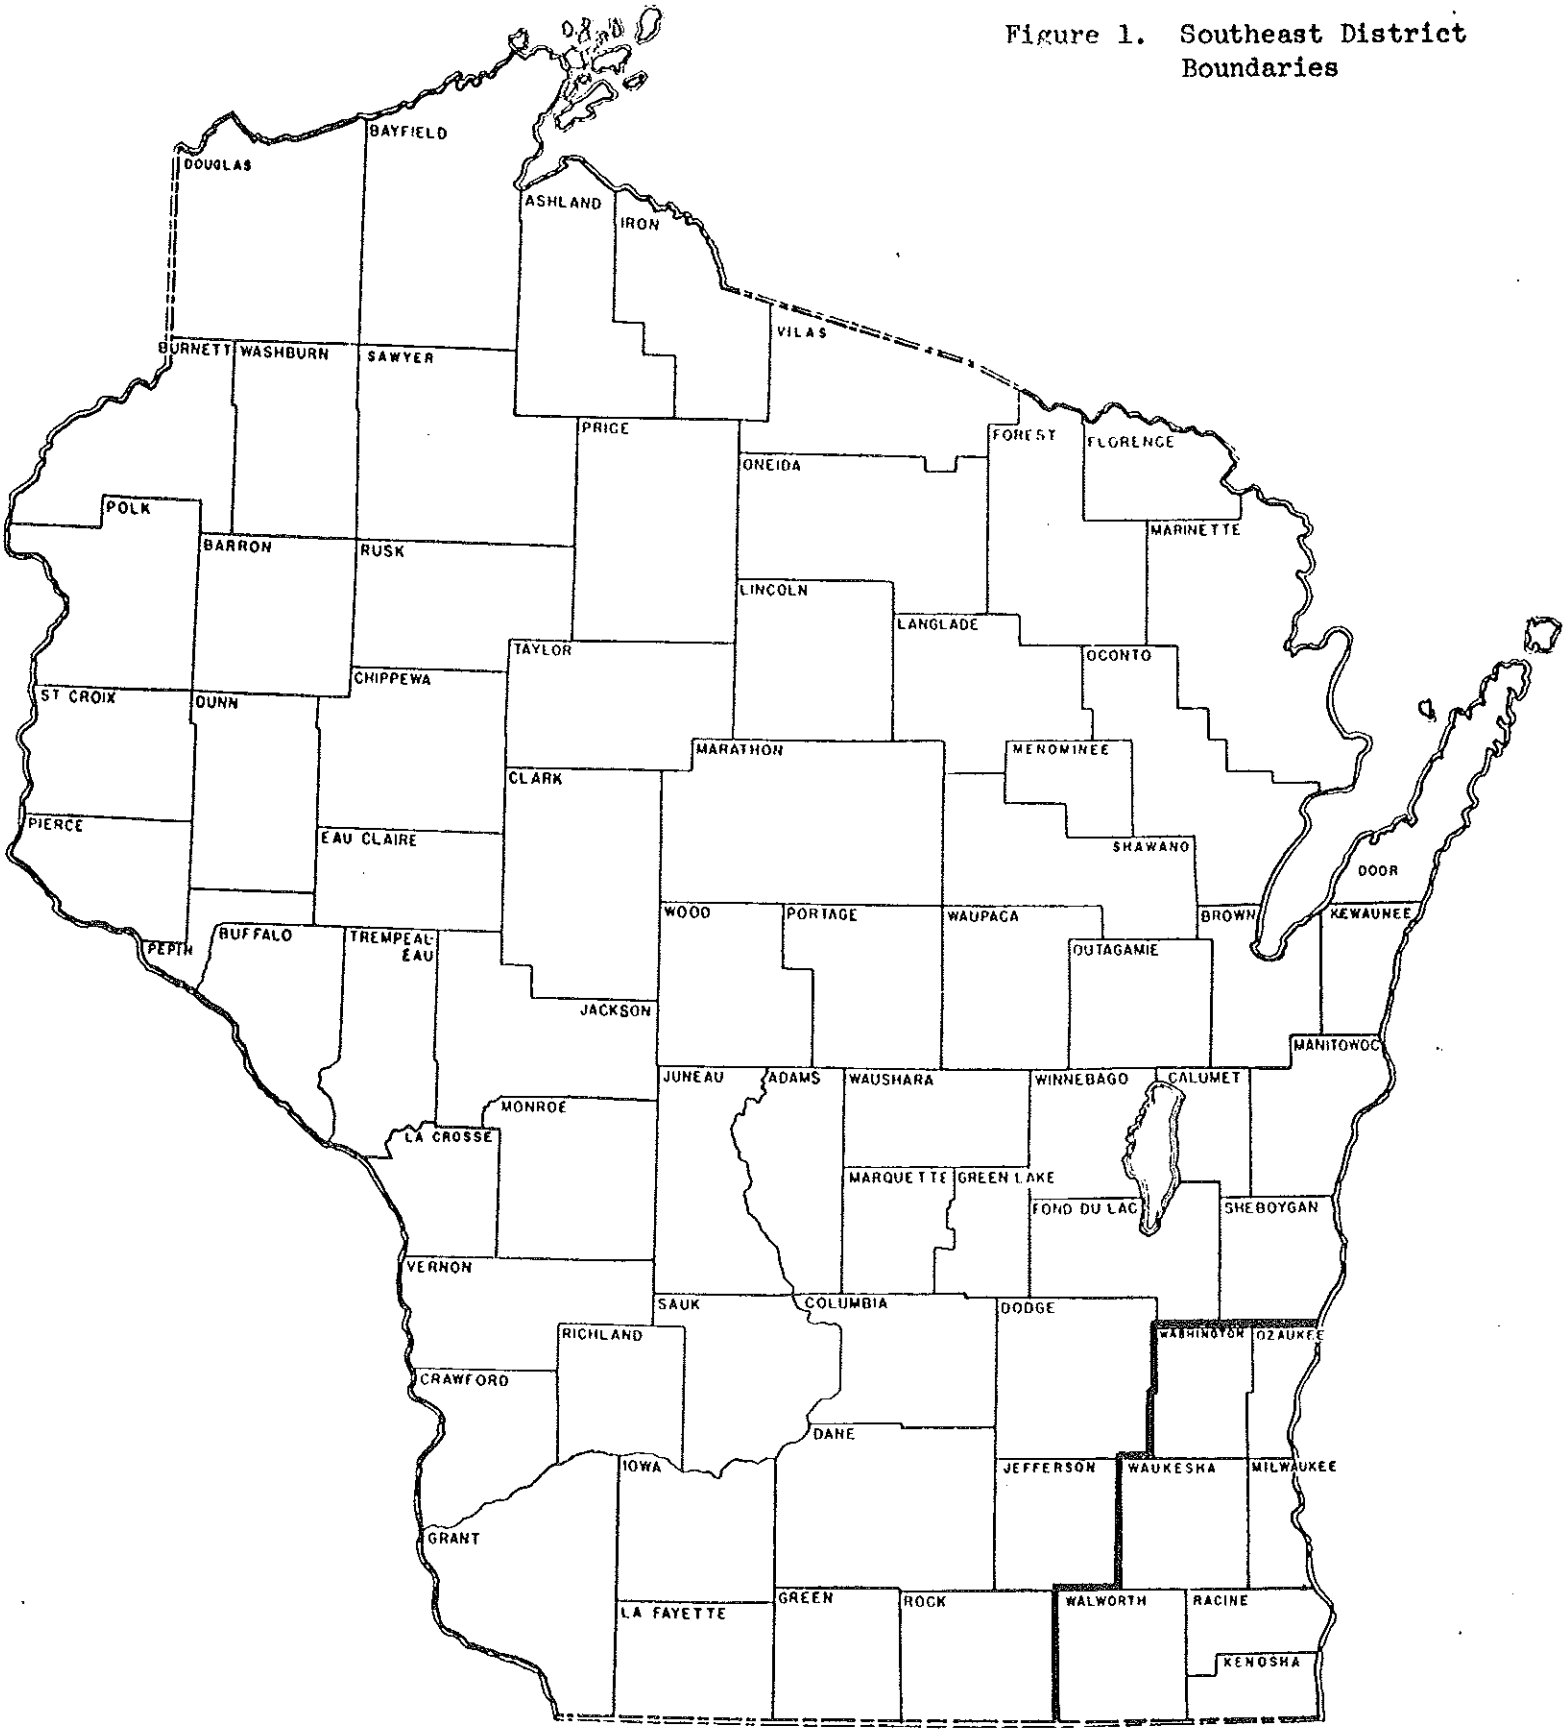

Table 1. Size classes of lakes and impoundments in the Southeast District

Acreage Classes	Natural Lakes Total Number	Natural Lakes Total Acreage	Impoundments Total Number	Impoundments Total Acreage	Total Total Number	Total Total Acreage
0-9	108	446	22	95	130	541
10-49	81	1720	16	394	97	2114
50-99	29	2096	5	309	34	2405
100-199	25	3185	4	488	29	3673
200-499	18	5676	1	227	19	5903
500-999	10	6731	0	0	10	6731
1000-1999	4	4366	0	0	4	4366
2000 and over	4	11795	0	0	4	11795
Total	279	36015	48	1513	327	37528

Forty-four percent of the lakes in the Southeast District are less than 10 feet deep, while six percent are greater than 50 feet deep. Depth classes of lakes are shown in Table 2. The deepest lake in the Southeast District is Lake Geneva which is 135 feet deep.

Table 2. Depth classes of lakes in the Southeast District

Maximum Depth Class(feet)	Number Lakes	Percent of Total	Area (Acres)	Percent of Total
Less than 5	56	17	760	2
5-9	89	27	3,118	8
10-19	61	19	2,920	8
20-29	40	12	3,866	10
30-49	60	19	11,612	31
50 or more	21	6	15,252	41
	327		37,528	

Fifty percent, or 71, of the named streams in the Southeast District are less than 10 feet wide. Thirteen percent, or 9, are greater than 40 feet wide. Streams greater than 40 feet wide provide 67 percent of the stream surface area. There are 141 named streams and 20 unnamed streams in the district. Table 3 depicts size classes of named streams.

The two major streams in the Southeast District are the Milwaukee and Fox Rivers. The Milwaukee River flows for 76.0 miles through the northern section of the district before entering Lake Michigan at Milwaukee. It covers an area of 1,038.3 acres in the district and has an average width of approximately 115 feet. The Fox River flows through the southern portion of the district for 79.4 miles to the Illinois border. It covers an area of 1,085.1 acres and has an average width of approximately 112 feet.

Table 3. Size classes of named streams in the Southeast District

Mean Width	Number	Area(Acres)	Length(Miles)
Less than 10 feet	71	180.7	246.9
10-19 feet	45	492.0	291.6
20-39 feet	16	674.9	186.8
40 or more feet	9	2,718.1	256.6
Total	141	4,065.7	981.9

The following is an alphabetical listing of the lakes and streams in the Southeast District. Several lakes and numerous streams lie in or flow through several different counties. An asterisk appearing next to the county name denotes such a case, and means that body of water is identical to the one appearing directly above it on the list. Under the "ID" heading, the number 1 denotes lake, 2 denotes stream, and 3 denotes impoundment.
