Pensaukee Unit Soil Suitability for Trails Green Bay West Shores

- Wildlife Project Boundary
- DNR Managed Land
- Subject Unit
- Other GBWS Unit

Source: USDA NRCS Soil Survey, Web Soil Survey. The rankings are based on the soil properties that affect trafficability and erodability. These properties are stoniness, depth to a water table, ponding, flooding, slope & texture of the surface layer. Additional site analysis may be necessary.

- ### Soil Rating for Trail Suitability Generally Not Suitable for Trails
- Not limited
 - Somewhat limited
 - Very limited
 - Wetland or Organic Soil*
 - Stony or Rocky
