

Donor Form

To contribute to the Wisconsin Trumpeter Swan Fund, complete this form and mail it with a check, payable to **Endangered Resources Fund**, to the address below. Please write "Trumpeter Swan Fund" on the memo line.

Endangered Resources Fund

Bureau of Natural Heritage Conservation
Wisconsin DNR
P.O. Box 7921
Madison, WI 53707

Name _____

Address _____

Amount:

- \$35 \$250
 \$50 \$500
 \$100 \$ _____

Contributions to the Endangered Resources Fund are tax deductible to the extent allowable by law.

Trumpeter Swan Recovery Program

Here are some successes this program has experienced since its inception in 1987:

- 385 eggs collected in Alaska from 1989-1997; 356 (92%) hatched
- 394 Trumpeters released to the wild from 1989-2005
- 220 pairs fledged at least 349 young in 2013
- received the 1997 Regional Conservation Award from the American Zoo and Aquarium Association and a 2009 Special Recognition Award from the Wisconsin Conservation Congress
- developed a strong team of partners: Milwaukee County Zoo, Windway Capital Corporation, UW-Madison Dept. of Wildlife Ecology, Natural Resources Foundation of Wisconsin, Raptor Education Group, Inc., U.S. Fish & Wildlife Service, and many financial supporters.

The message of the Trumpeters will be repeated each time these wild calls echo across the United States and Canada. As they pass overhead, they will continue to remind us that wildlife's future lies in our own hands. We have choices and solutions.

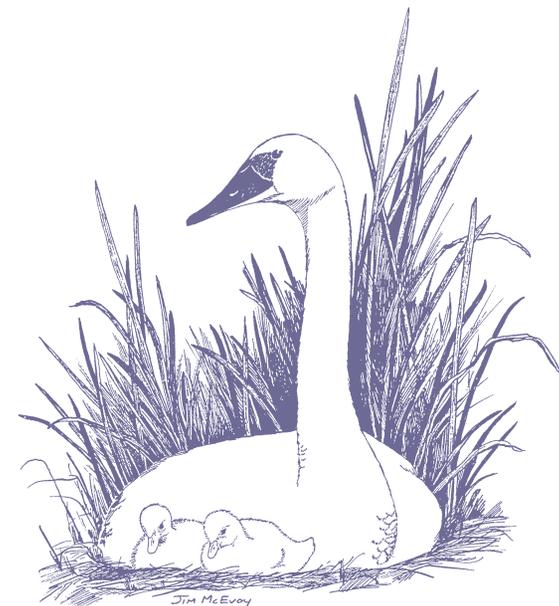

- Ruth Shea, swan biologist

The Wisconsin Department of Natural Resources provides equal opportunity in its employment, programs, services, and functions under an Affirmative Action Plan. If you have any questions, please write to Equal Opportunity Office, Department of Interior, Washington, D.C. 20240.

This publication is available in alternative format (large print, Braille, audio tape etc.) upon request. Please call 608/266-7012 for more information.

Wisconsin's Trumpeter Swan Fund

A nest egg for Wisconsin's
Trumpeter Swan Program

Trumpeter Swans - A History

North America's largest waterfowl, the trumpeter swan, was once a prominent resident of Wisconsin's lakes and marshes.

In 1805, when explorers Lewis and Clark first encountered these large snowy-white birds, they were found throughout most of the northern United States and Canada. By the mid-1930s only 69 trumpeter swans were known to remain in the continental United States.

Market hunting for skins, down, quills, meat, and the fashionable millinery trade of the 1800s brought the trumpeter swan to near extinction.

By the late 1800s, Wisconsin's last known breeding Trumpeters had vanished.

A growing interest in preserving the trumpeter swan has led to full-scale efforts to restore this species to its former range in the Midwest.

In 1987, the Wisconsin Department of Natural Resources, in cooperation with a variety of organizations and individuals, began implementing a trumpeter swan recovery plan for the state.

Following an ambitious program of collecting eggs in Alaska for eight years and raising cygnets in captivity and in the wild, approximately 2,000 free-flying trumpeter swans now grace Wisconsin wetlands.

Trumpeter Swan Fund

Two essential keys to the success of Wisconsin's Trumpeter Swan Recovery Program are adequate funding and an aware, educated public.

Donations are used to cover costs of aerial surveys, health checks, other monitoring activities, and public education efforts. By marking (using numbered plastic collars) and monitoring most of Wisconsin's trumpeter swans since 1989, the Wisconsin DNR has compiled the most complete set of information on the ecology and movements of this species that exists anywhere.

*In the glowing firmament
rode the long baseless triangles
of the Swans, sweeping across the upper air
in exalted and unswerving flight, spanning a
continent with the speed of the wind, their forms
glistening like silver in the sunset glow. They
presented the most impressive spectacle
of bird life ever seen in North America.*

- Edward Howe Forbush, 1917

For your generosity....

- **Receive progress reports** on Wisconsin's trumpeter swans in September and year-end.
- **Receive information/gifts** for the following contribution levels:
 - \$35 Life Tracks publication on trumpeter swan ecology
 - \$50 Video on Wisconsin's Trumpeter Swan Recovery Program
 - \$100 .. (While supplies last)
The Trumpet of the Swan by E.B. White, newly illustrated and signed by Fred Marcellino
