

**Program Guidance – Updates to the Timber Sale (2461) Handbook  
Summary of Public Comments and Changes**

Comments were received from two people. Each indicated that the draft stumpage rates for the property that they worked on were incorrect (either the draft handbook rates were not the rates they had submitted or there were errors in the rates they originally submitted).

As a result of the above comments, the Department did make changes to the guidance for stumpage rates on the Clark County Forest and on the Northern Highland American Legion State Forest. The final guidance was issued on November 3, 2014.
