

Response Summary on Public Comments Received on the  
Storm Drain Inlet Protection for Construction Sites

August 18, 2014

The following comments were received on the above noted draft during the 21 day comment period:

1. In V. C. b. Change the word minimum in the second sentence , to “nominal”.
2. In VI. J. Add to the end of the sentence “where more effective filtering is desired.”  
This should help clarify that only types D-M or D-HR should be used where more effective filtering is desired.
