

Waste Received from Off-Site (WR) Form

- WR Form not used for 2008 (or for any “short report” year)
- WR Form is required (only for odd-numbered report years) for licensed treatment, storage, disposal facilities (TSDs) or publicly owned wastewater treatment works (POTWs) that accept hazardous waste from off-site

13

The Waste Received from Off-Site (WR) Form documents the quantities and characteristics of each hazardous waste received from an off-site source.

The information on the WR Form is only collected for odd-numbered report years (sometimes called “long report” years), and is only required of treatment, storage, disposal facilities (TSDs) or publicly owned wastewater treatment works (POTWs) that accept hazardous waste from off-site. Upon completion of the Reporting Requirements screen in the Web Reporting System, the forms required for the current report year will be listed for the reporting site.

The WR Form is not required for any sites for the 2008 report year.
