

American Transmission Company (ATC) Green Tier - Tier 1 Applicant Comments

Mr. Eggert,

I wish to support the application of ATC in the Green Tier program. As a member of the NWTF's Energy for Wildlife program, ATC has worked to write and implement policy and programs that have a positive impact on wildlife species and their habitats. After reviewing the application, ATC has provided information on how the company can provide and/or improve environments throughout their service area, while also being able to transmit the energy needed by the public of Wisconsin and neighboring states. We are working to identify project opportunities on ATC rights-of-way for implementation with local NWTF chapters and other groups as well as assisting ATC in other issues of vegetation management.

Please let me know if I can help with any additional information on ATC, the NWTF or the Energy for Wildlife program.
