			Unfunded SDWLP Project Costs =	\$ 84,895,597									

Notes:

The department determined some projects are ineligible for SDWLP funds based on the Intent to Apply form, Priority Evaluation and Ranking Form or Financial Assistance Application received by 04/30/09.

Ineligible projects are not included on the Project Priority List or this Draft Funding List.

No one municipality may receive more than 25% of the biennial present value of subsidies available. The maximum loan amount in the 2009-11 biennium is \$22,916,667 based on a 6% planning rate.

<sup>1</sup>With the exception of those projects highlighted in yellow, the allocations of funds in these columns are estimates based on the estimated SDWLP project costs requested in municipalities' financial assistance applications.

All allocation estimates shown on this Draft Funding List are subject to change. Municipalities with projects near the border of the fundable range should be aware that changes in projects above them on the list will impact the projects near the estimated fundable range.
