

Statewide List of Farmers Issued Deer Damage Shooting Permits in

The deer damage shooting permit program is one part of Wisconsin's Wildlife Damage Program, which assists farmers when wildlife damage their agricultural crops. Wisconsin DNR Wildlife Manager's issue these special permits to farmers who are experiencing severe damage for removal of the deer causing damage. Farmers who receive the permits have the option to provide some of their tags to hunters who would like to help them shoot antlerless deer only that are damaging their crops. Again, farmers are not required to allow hunters to use their damage tags. The permits are valid both inside and outside of the regular hunting seasons, and the deer must be shot with a gun unless otherwise specifically authorized on the farmer's permit.

Note: These are only a portion of the farmers whose lands are open to hunting by the public during the open season. Please check out our website at www.dnr.state.wi.us/org/land/wildlife/damage for more information on how to get complete lists of all farmers whose lands are open to hunting by the public during the open season through the Wildlife Damage Abatement and Claims Program.

Please be courteous to farmers! Please call them well ahead of time to plan your hunt, and please don't call them after 8
