To Allow Elder Persons the use of All Terrain Vehicles as a Mode of Conveyance During Hunting

There are elderly people who don't have severe physical disabilities, but who need help in walking the hunting terrain. ATV use permits are given to disabled people, but not to people who just need a little help.

It is proposed that persons over the age of 65, may apply for a permit to use a ATV as a mode of conveyance during hunting. This permit would mirror the laws and regulations of the Motorized Vehicle for Disable Hunting on State and Private Lands.

On public, state and private lands
