Title: Spear Northern Pike Through The Ice

Problem:

Many lakes in the state of wisconsin have a abundance of northern pike.

Ice fishing method's used now is either jig pole or a tip-up.

Spearing northern pike through the ice would be a nice change for fish angler's. The excitement of luring a pike in on a decoy that maybe a angler had carved out and to spear the fish would not only be challenging but also exciting and very rewarding.

State of michigan allow's a angler to spear northern pike through the ice.

Be it Resolved, that the Conservation Congress at its annual meeting held in Forest County on April 14, 2008 recommends that the Conservation Congress work with the Department to take action allow wisconsin angler's to spear northern pike through the ice.
