

Recommendations
by the
Groundwater Advisory Committee

2007 Report to the Wisconsin Legislature
Pursuant to 2003 Wisconsin Act 310

Table of Contents
Executive Summary

Chapter 1: Introduction

Background (Include Relation to 2006 Report)
Legislative Charge

Chapter 2: Groundwater Protection Areas (GPA)

- 2.1 Existing Framework
 - 2.1.1 Background and discussion of GPAs
 - 2.1.2 High capacity well application review process
 - 2.1.3 DNR experiences with wells in GPAs since enactment of Act 310
 - 2.1.4 Assessment of effectiveness

- 2.2 Recommendations for changes in the regulation of high capacity wells that are in GPAs - Alternative implementation approaches considered by GAC (Position Papers).
 - 2.2.1 No change in GPA Framework
 - 2.2.2. Replace Current GPA concept with a case-by-case science driven review process
 - 2.2.3 Increased distance
 - 2.2.4 Expanded scope of “protected waters”

- 2.3 Adaptive management issues – GPAs
- 2.4 Recommendations for legislation
- 2.5 Recommendations for administrative rules

Chapter 3: Springs

- Background (value of springs and susceptibility to impacts from pumping)
- 3.1 Existing definition
 - 3.1.1 Assessment of effectiveness – DNR experiences, documented problems
 - 3.1.2 Research – Inventories of springs
 - 3.2. Issues related to definition
 - 3.2.1 Flow Rate
 - 3.2.2 Flow frequency

3.2.3 Discharge at the surface of the land vs. other approach (pond, diffuse seepage, etc..)

3.3 Recommendations regarding the definition of spring in section 281.34 (1) (f), Stats.

3.3.1 Alternative Approaches Considered by GAC

- 1)
- 2)
- 3)

Chapter 4: Projects with High Water Loss

4.1 Background and discussion

4.2 Recommendations for changes in the law as it pertains to high capacity wells that have a water loss of 95 percent or more

Chapter 5: Determination of Significant Adverse Environmental Impact

5.1 Chapter NR 820 approach

5.2 Issues with existing approach

5.3 Recommendations for additional factors the department should consider in rules used to determine whether a high capacity well causes a significant environmental impact legislation

Chapter 6: Regulation of High Capacity Wells in General

6.1 Potential for use of general permits

6.2 Strategies for Adaptive Management in Regulation of High Capacity Wells

6.3 Conservation

Chapter 7: Funding

7.1 Existing funding sources

7.2 Existing and anticipated expenditures

- Administration
- Local Aid
- Research
- Mitigation

7.3 Adequacy of funding mechanisms

7.4 Recommendations for legislation

7.4 Recommendations for administrative rules

Chapter 8: Summary of Recommendations

8.1 Legislative recommendations

9.2 Recommendations for administrative rules
