Project Subject/Title: Oak Regeneration – Whalen Creek County: Washburn TRS: T40N R12W sec. 13; comp.240/14

Contact Person: Jim Halvorson, 715-635-4081 Type of Prescription: Site Preparation Year Initiated: 1992

Abstract/Prescription:

In October of 1992 site preparation in a mature red/white oak stand was implemented prior to shelterwood harvest. Site preparation was done using a crawler tractor to control understory hardwood saplings. The shelterwood harvest was done in August of 1994. A regeneration stocking survey was done in late 1994.

Results:

The stocking survey in late 1994 showed 58% stocking or 1275 tree/ac at 3 –12" height.

Discussion/Recommendations:

• Continue monitoring for survival and growth and then when overstory removal
