

NR 146/NR 812 Rule Revision Advisory Committee Ground Rules

- This advisory committee is tasked with providing input on potential changes to Chapters NR 146 and NR 812, Wis. Adm. Code.
- This advisory committee will discuss possible rule changes but will not generate proposed rule language as it is outside the scope of this group.
- All members will listen respectfully and will offer ideas in a constructive manner.
- Members are encouraged to seek input from other pump installers, well drillers and associated staff, and share it with the group.
- The meetings will only be focusing on specific areas of the rules; other ideas may be noted, but will not be discussed in this advisory committee.
- All meetings are open to the public and comments will be accepted from non-workgroup members at the end of each meeting.
- Meeting agendas will be set to address specific areas of the rules under consideration. In the interest of efficiency, committee members will be asked to limit discussion to agenda items.
