Re: Transfer of Emission Reduction Credits
Briggs & Stratton Corporation - Wisconsin Electric Power Company
WDNR Permit # 94-DAA-263-OP

Dear Ms. Eagan:

On March 11, 1996, the Wisconsin Department of Natural Resources issued permit 94-DAA-263-OP to Briggs & Stratton Corporation. The permit established the creation of 23 tons of VOC emission reduction credits from the removal of solvent degreasers, which were replaced with aqueous parts cleaning operations, at our former Menomonee Falls plant (FID 268011370).

On January 15, 1998, Briggs & Stratton Corporation transferred full title to, and ownership of, the VOC emission reduction credits to Wisconsin Electric Power Company.

If you have any questions regarding this transaction or require additional information, please call me at (414) 259-5671.

Sincerely,

Briggs & Stratton Corporation

David M. Boyd, P.E.
Corporate Environmental Manager
