New DNR air quality maps viewable on smart phones and tablets

MADISON – Wisconsin’s air quality has not only improved in the last 30 years, it’s now also easy to see from your smart phone and tablet, thanks to the Department of Natural Resources.

The agency has made its new air quality maps viewable from the popular hand-held devices, making it easier for the public and businesses to look at current air quality conditions, check the latest information on Air Quality Advisories or learn about special Air Quality Notices.

“We’re always looking for better ways to share real-time air quality information with the public,” said DNR Air Program Director Bart Sponseller. “Our new maps are not only more user-friendly for your computer, you can now quickly access them away from home, on the go, wherever you are.”

In addition, Sponseller noted the maps have helpful graphs of hourly pollutant measurements at each DNR air monitoring site. The maps are also available on the Air Program website airquality.wi.gov/StateMapping.aspx and allow users to access air monitoring data around the clock.

Eco-driving class set for over-the-road truckers

[Wisconsin Clean Cities](#) and [Waukesha County Technical College](#) are offering a new training course: *Eco-Driving for Class 8 Over the Road Truckers*. The course, which is free for Class 8 truckers who operate out of southeastern Wisconsin, will be presented at WCTC Transportation (T) Building, 800 Main Street, Pewaukee, WI. The flyer below provides more details. To register call 414-221-4958 or email info@cleancities.org.

Eco-Driving Training to be Offered at Waukesha County Technical College

This October, thanks to a grant from the Wisconsin Department of Natural Resources, Wisconsin Clean Cities and Waukesha County Technical College will be offering a new training course in Eco-Driving for Class 8 over-the-road trucks. This is an invaluable opportunity for fleets to reduce their fuel costs.

The course is intended to teach drivers ecologically and financially sound techniques like efficient route planning, vehicle maintenance checks, efficient refueling, and eco-driving skills.

The course consists of two hours of classroom learning, one hour simulator training, and two hours of on-the-road driving. Drivers that complete the course are also required to attend a two hour follow-up session.

The training is free, but attendees must be located in Southeastern Wisconsin. There are six spots open per class, and it is first come, first serve. So sign your fleet up today!

Location: Waukesha County Technical College
Transportation (T) Building
800 Main St., Pewaukee, WI

Instructors: Mark Huss and Matt Eisert
