Wisconsin DNR

To Whom This May Concern,

Please accept our application into the DNR Green Tier program along with this letter describing our Tier 1 performance and future goals.

As per my conversation with Christine and Claudia yesterday, our goal is continuous improvement throughout our organization and, from an environmental standpoint, we are in the process of getting R2/ISO:14001/OHSAS:18001 certified with an expected completion date of mid-July 2013.

The Green Tier program represents a variety of opportunities for R3NEW. There is currently no R2 or eStewards recycler within two hours of the Fox Valley and it doesn't appear any other recyclers in the area have an interest in elevating their business to this level. Thus, our initial Green Tier goal is to bring substantial economic benefit to NE Wisconsin as an E-Cycle Recycler. Currently all of the CED/EED's generated by collectors in this area are sent at least two hours away and often out of state...benefiting consumers in the disposal of equipment but not our local economy by keeping the product 'close to home.'

Thanks again for this wonderful opportunity and we look forward to joining the Green Tier program!

Sincerely,

Brian Arpke
President
