### Phillips-Medisize Is Recognized for Environmental Performance

October 10, 2013 (Hudson, WI) – Today, Phillips-Medisize announced its Design Development Center, located in Hudson, Wisconsin, has been recognized by the Wisconsin Department of Natural Resources (DNR) for its environmental excellence, making that facility part of their Green Tier Program.

Phillips-Medisize has been a long-standing participant of the Green Tier program since 2008, and now, all of its facilities located in Wisconsin hold this distinction. Under the Green Tier program – one of Wisconsin's flagship environmental performance programs – companies work hand-in hand with the DNR and voluntarily commit to environmental performance standards that go beyond regulatory compliance.

Through the Green Tier Program, Phillips-Medisize will continue to work with the DNR in upholding the highest standards of sustainability while continuing to achieve specific waste and energy reduction goals, as well as, recycling and technological innovations for environmental protection. "Phillips-Medisize is a shining example of corporate responsibility in the area of sustainability and we are proud to welcome their Hudson facility into the Green Tier Program," said DNR Secretary Cathy Stepp.

Matt Jennings, President and CEO of Phillips-Medisize Corp. said, "Sustainability is very important to all of us at Phillips-Medisize. Our company has a long history of environmental awareness and as such, we have dedicated both time and resources to assure all of our facilities, globally, take our ecological responsibilities seriously. I am very proud of our employees around the world for their significant efforts in the development and execution of our sustainability programs."

Green Tier is just one of a number of awards Phillips-Medisize has received for environmental performance. For example, in 2009 and 2012 the company received the Wisconsin Business Friend of the Environment Award; in 2011 it received the Xcel Energy Environmental Excellence Award and has been awarded the distinction of "Green Master" since 2010.

#### **About Phillips-Medisize Corporation**

Phillips-Medisize is a leading global outsource provider of design and manufacturing services to the medical device and diagnostics, drug delivery and commercial markets. The company has annual sales of just over \$500 million with 75% of the total revenue coming from drug delivery, medical device and diagnostic products such as: disposable insulin pens, glucose meters, specialty inhalation drug delivery devices, single use surgical devices and consumable diagnostic components.

Phillips-Medisize Corporation features a list of blue chip medical device, pharmaceutical and commercial customers. The company partners with its customers to provide design and development services which accelerate speed to market of innovative products and then works with its customers to deploy advanced automated assembly and quality control technologies which reduce manufacturing cost while improving quality. The company's core advantage is the knowledge of its people to integrate design, molding, and automation to drive low cost and high quality manufacturing solutions.

Phillips-Medisize Corporation is headquartered in Hudson, WI, and employs over 3,100 people in 19 locations throughout the United States, Europe, Mexico and China. The company also has design centers in Wisconsin, California, and The Netherlands.
