

**Species Assessment Group - Summary of group ratings**

Date: 9.20.07

**Species: Sirococcus clavignenti juglandacearum (Butternut Canker Pathogen)**

**Members of the SAG: Art Wagner, Dr. Ken Raffa, Melody Walker, Anette Phibbs, Dr. Glen Stanosz, Karen Danielsen**

**Linda Haugen**

Ratings for Criteria - 1st round	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
1. Current status and distribution	1	1	1	1	1	1	1								
2. Establishment potential	4	4	4	4	4	4	4								
3. Damage potential	4	3	4	4	3		3								
4. Prevention and control potential	1	1	1	2	1	1	1								
5. Socio-economic impacts	3	2	1	2	2	2	1								
<b>Totals - 1st round</b>	Prohibited			Restricted			Watch			Non-restricted					
Number of votes							7								

**Recommended Classification : Watch**

Comments: The widespread distribution of this pathogen in Wisconsin's forest environment, the pathogen's ability to spread rapidly and the lack of management options led the SAG to classify this pathogen as watch. No regulatory actions would impact this pathogen in a meaningful way. Continued monitoring is valuable as silvicultural management is an option for maintaining butternut in Wisconsin's forests.

Ratings for Criteria - 2nd round	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
