

Parent File G 1927/Sale File WM 60425 – Manitowoc County 19.95 Acres

The Department acquired this parcel as part of a 60 acre acquisition for \$1,460 in 1965 primarily for waterfowl marsh management for the Killsnake Wildlife Area. The parcel is located approximately 4 miles from the Town of Collins in Manitowoc County.

A small unnamed stream originating off of the South Branch of Manitowoc River runs southeast through the north 1/2 of the parcel providing approximately 865 feet of 2-bank frontage. There are two Natural Heritage Inventory (NHI) hits on this parcel: Gorgone Checker Spot Butterfly (adult document in 2009) and Northern Wet-Mesic Forest Community.

The Department has not made significant investments in infrastructure or habitat improvements.

The property has no road access, so use is limited to the adjoining private lands and the general public is restricted to legal access from the unnamed creek.

The Department recommends that the Natural Resources Board offer this land for sale to adjoining land owners under the authority granted by s. 23.145 Wis.
