On December 13, 2012, the Department of Natural Resources (DNR) established a timeline for the West Shore Pipeline Company and the Town of Jackson to move forward with establishing a long term water supply solution for the area impacted by the pipeline break. DNR held a public informational meeting on February 18, and received a great deal of feedback about the Arcadis report from residents. On March 14, at the Town Board meeting, Chairman Heidtke requested additional time to make a formal recommendation regarding a long term water supply solution. DNR agreed, per the town’s request, to extend the timeline established in the December 13 letter to the April 4th Town Board meeting.

DNR’s goal continues to be steady progress towards selecting and implementing a long term water supply solution. To aid in that effort, comments from DNR regarding the Arcadis report have been sent to the West Shore Pipeline Company. Please see the letter from the department to West Shore for further details.
