

Peshtigo River Canoe Campsite Information

Rules and Regulations

Camping is permitted only at designated sites. Do not cut or damage living trees or shrubs. No more than six persons on a site. No fee is required. Access must be by watercraft only. Camping is limited to one night only. Sites are available on a first-come-first-serve basis. Yellow signs visible from the water indicate each campsite's location.

SAFETY INFORMATION

- **Canoeing**

Every watercraft must carry a US Coast Guard approved wearable lifesaving device for each person aboard. Passengers should wear their life jackets at all times. Each paddler should be aware of changing conditions on the river. As a rule, do not overload your watercraft.

- **Campfires**

Use caution and confine fires to a fire ring. Put the fire out if wind changes cause concern. Watch children closely near the fire. Once you have put a match to the fire don't use charcoal starter or any other flammable material. Make sure the fire is completely out and the grill or fire ring is cool before you leave the area.

- **Drinking Water**

There is no potable water located at the campsites or nearby. Boil all water, use approved tablets or filters before drinking.

- **Plants**

Never eat berries or plant materials unless you are certain of their identity.

- **Garbage and Waste**

Please do not leave your garbage or recyclable items "for the next camper." This is not appreciated by your fellow canoe campers and can distract from the rustic setting. Please leave the forest cleaner than when you arrived.

- **Amenities**

Each site has a fire ring and a tent pad. A Minnesota privy is located nearby.
