

# Good Neighbor Authority Sale Area Map

## Wisconsin Department of Natural Resources

### Sale Name: County Line North A-B Timber Sale

### Tract # 8001/5-16

Sale Location and Size:  
 T43N-R6W Section 32. 250 Acres  
 Namakagon Twp, Bayfield County, WI  
 Great Divide Ranger District  
 Chequamegon-Nicolet National Forest

#### Harvest Specifications:

NOTE: See prospectus page for additional harvest specifications.

Harvest all aspen, paper birch, and ironwood containing 2 or more pulpstick, all balsam fir containing 3 or more pulpsticks, and all trees marked with blue paint.

Utilize all trees cut to a 4 inch top diameter or smaller.

Do not cut any trees in the single track bike and ski trail buffer areas.

#### Boundary Markings

-Private boundary is marked with red paint.

-Exterior boundaries, as well as some interior boundaries, are marked with orange paint. (The boundary immediately adjacent to the Rock Lake Road is not painted orange, as the road serves as the boundary.) Purple paint was utilized in a short portion of the north boundary to divided this sale from a future sale to the north.

-Double-dot orange paint indicates a recreational no-cut buffer or a ski trail is immediately adjacent.

Do not cut any orange, red, or purple marked trees.

GOOD NEIGHBOR AUTHORITY PROJECT  
**COUNTY LINE NORTH A-B TIMBER SALE**  
Chequamegon-Nicolet National Forest  
**TRACT #8001/5-16**

**Location:** T43N R6W Sections 32 in the Town of Namakagon, Bayfield County, WI

**Sale Area:** 250 Acres

**Sale Type:** Scaled Sale. (Mill Scale for cordwood, with logs to be scaled on site by GNA sale administrator/personnel.)

<u>SPECIES</u>	<u>VOLUME</u>	<u>MINIMUM BID</u>
ASPEN	1600 CDS	\$29.90/CD
RED OAK	1060 CDS	\$18.70/CD
MIXED HARDWOODS	1225 CDS	\$28.10/CD
WHITE BIRCH	350 CDS	\$24.30/CD
BASSWOOD	180 CDS	\$9.40/CD
BALSAM FIR	25 CDS	\$23.90/CD
RED OAK LOGS	115 MBF	\$229.00/MBF
BASSWOOD	47 MBF	\$108.00/MBF
HARD MAPLE	17 MBF	\$168.00/MBF
MIXED HARDWOODS	16 MBF	\$168.00/MBF

**Minimum Acceptable Bid: \$149,834.00**

- Mixed Hardwood pulpwood is estimated to be 55% hard maple, 42% soft maple, and minor amounts other species.
- Mixed Hardwood log volume consists of an estimated 9 MBF paper birch, 5 MBF white ash, and 2 MBF red maple.

**Harvest Requirements- Seasonal Restrictions:**

- Harvesting operations are limited to July 15- April 15 over the entire sale area due to oak wilt restrictions. Harvesting operations are further restricted (prohibited) adjacent to (within line of sight) of cross country ski trails between December 1 and May 1.
- Due to the presence of ski trails and single track and two track bike trails, harvesting operations are not allowed on weekends (noon Friday through midnight Sunday) and holidays (daylight hours on Memorial Day, 4<sup>th</sup> of July, and Labor Day).
- Harvesting only allowed during times of dry or frozen ground. Rutting is restricted per Wisconsin Water Quality BMPs and section # 19 of the timber sale contract "Soil Disturbance and Rutting".

**Harvest Requirements- General:**

- Sale will be scaled sale using a 30 day billing period.
- No bid bond is required at the time of bidding, but a performance bond of 15% of the total sale value will be required of the winning bidder within 6 weeks of bid opening, or at the time of contract signing, whichever is sooner.

Contract length is 2 years, with extensions possible consistent with other State timber sales.

- Equipment must be cleaned before entering and leaving the sale area to prevent the introduction/spread of invasive species.

- Stand boundaries are marked in orange paint. Ski and Single Track bike trail buffers are marked with double-dot orange paint. A very short portion of the north boundary is marked in purple paint. **Do not cut red, orange, or purple paint marked trees.**
- Leave all standing snag and den trees that do not pose a safety hazard.
- Utilization will be to at least a 4" top.
- Care must be used while felling, bucking and skidding to protect the residual stand.
- Keep all logging debris within sale boundaries.
- Slash height must be 24" or less within 100 feet of the Rock Lake Road (FR207) and also within 150 feet of ski and bike trails. Slash is also required to be removed a distance of 10' from adjacent private property boundaries.

#### **Harvest Requirements- Roads and Skid Trails:**

- Rock Lake Road (FR207) is also a snowmobile and ATV route. It is normally left unplowed in the winter and groomed for the benefit of snowmobilers, so hauling is discouraged during the snowmobile season, but not prohibited.
- "Logging Operations Ahead" signs (DOT approved) will need to be placed on the Rock Lake Road by the contractor during times of timber hauling.
- Decking is not allowed adjacent to the Rock Lake Fire Lane without township permission, and obtaining permission from the township will be the responsibility of the contractor. Decking locations will be discussed at pre-sale meeting.
- All roads utilized, excepting the Rock Lake Road and FR207C, will be temporary roads and the contractor will be required to properly decommission the temporary roads after sale completion. Typically this means returning the road to its' presale condition or better by shaping, grading, seeding, and placing large rocks or berms at entrances from public roadways in order to inhibit their use by motorized vehicles. Berm material may be soil piled 4.5 feet high or large boulders unable to move with manpower or truck, wide enough to block access. If a gate is currently in place, berming will not be necessary. FR207C shall be closed to public access utilizing one of the above methods.
- Where temporary haul roads intersect with the Rock Lake Road, the contractor is required to apply 6" thickness of gravel on the temporary road for 100' from town road during non-frozen conditions.
- Any new temporary road construction will require the advance approval of the timber sale administrator.
- Two-track bike trails (bike trails located on old logging roads) are eligible to be utilized as temporary roads during the logging operations for hauling access, decking, and forwarding, but trails must be signed and cleared of slash immediately.
- Ski trails and single track bike trails should not be used for access, decking, and forwarding or skidding.
- Crossing ski trails and single track bike trails with logging equipment must have prior approval of the timber sale administrator and should be minimized to avoid impacts to those trails and their users. Trails should be crossed as right angles and must be marked with ribbons and signs to warn recreational users. Crossing sites must be restored to original or better condition following harvesting operations, and before December 1<sup>st</sup> in the case of ski trails.
