---

**Estimated Price for Entire Sale = \$10,351.00**

### Purpose of Sale:

To thin areas of red pine to increase tree growth and quality.

### Special Operating Requirements and Slash Disposal:

1. The sale area is sandy and flat to gently rolling and has no seasonal restrictions, however, **this sale requires the Purchaser to complete Annosum root rot preventive treatment if harvesting between 4/1-11/30.** Treatment must be performed by a Certified Pesticide Applicator. Treatment involves chemically treating all fresh-cut stumps of pines of merchantable size by applying either Sporax (sodium tetraborate decahydrate) or CELLU-TREAT (disodium octaborate tetrahydrate). Treatment shall be made the same day as harvest and a dye product shall be added to liquid solutions for inspection purposes. The cost of this application can vary based on application method and harvest conditions, but should be considered when submitting bids on this timber sale.
2. Trees to be harvested are marked in orange paint. The sale boundaries are marked with a red paint line and a blue paint line to the west. Do not cut painted boundary trees and do not fell trees across the blue line.
3. No biomass harvesting is allowed on this sale due to low nutrient soils.
4. All pine products cut between March 1st and August 30 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed before March 15<sup>th</sup>.
5. All landings, roads and berms must be approved in advance by a DNR forester before operations begin and shall be restored to the forester's satisfaction following the harvest completion.
6. The snowmobile trail touches the far southwestern corner of this sale. The trail must be kept free of debris at all times. **No hauling on the snowmobile trail when the trail is open for users.**

### General Requirements:

1. All designated tree species must be cut and forwarded concurrently with the sale.
2. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
3. Do not cut or knock down any dead or hollow trees. These are important wildlife habitat. Any that must be cut shall be left in big pieces on the forest floor.
4. Utilization: cut and use all designated trees with one or more 100" sticks to a 4" top diameter.
5. Notify the DNR forester before you start the job, and each time you pull out or return to the job.
6. Any trees cut or pushed over for new roads or landings must be utilized or cleaned up to the DNR Forester's satisfaction.
7. Contact the town of Millston prior to beginning logging operations at: 715-284-0913. A free permit is required for hauling on their roads year-round.
8. **Wisconsin's Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! This involves brushing away all dirt and cleaning air intakes of debris.**
