

BRSF Tract 1-17
Campground Corner
T22N-R3W Sec 12

Sale size: 81 Acres
Contract Period: 2 years

Estimated Volume

<u>Species</u>	<u>Cord Equivalent</u>	<u>Tons</u>	<u>Advertised Value/Ton</u>
Jack Pine*	(1010)	2150	\$ 8.60
Aspen	(210)	475	\$ 6.70
Maple**	(70)	165	\$ 7.40

* Includes approx. 10 tons tamarack (5 cords)

** Includes approx. 25 tons white birch (10 cords)

Estimated Price for Entire Sale = \$ 22,893.50

Purpose of Sale: To regenerate a mixed jack pine stand.

Special Operating Requirements and Slash Disposal:

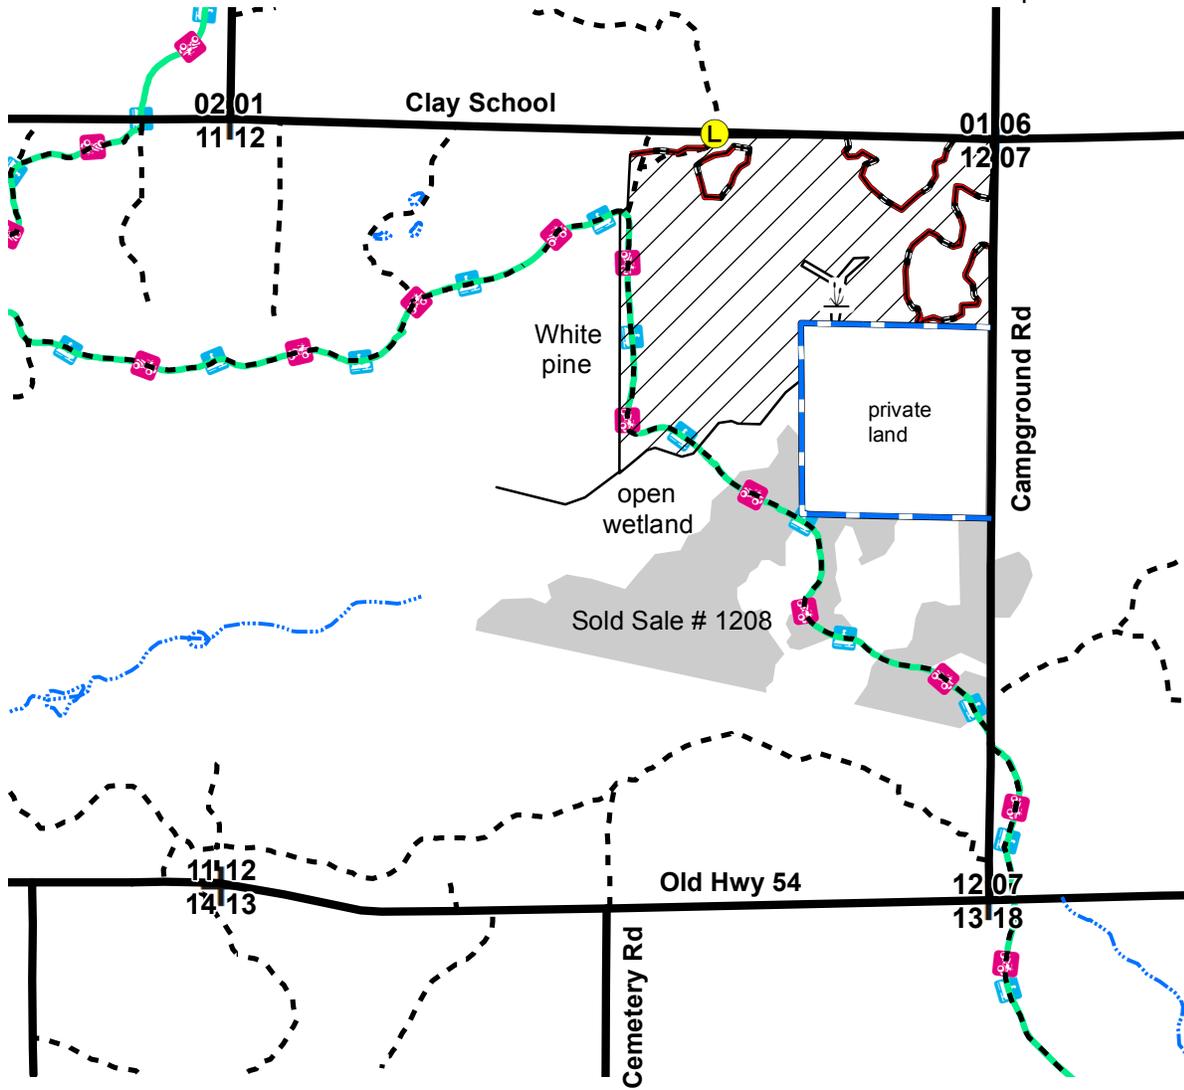

1. This sale is located on low ground and will require **dry or frozen** conditions for access and operating.
2. No biomass harvesting may be done on this site, as the tops will be needed on skid trails to minimize damage to high-water table soils.
3. The sale boundaries are red paint lines, open marshes, town roads, a white pine stand, and a blue paint line. Do not fell trees or lay slash across the blue paint line. This is a private land boundary - do not trespass or cut blue painted trees.
4. Access into the sale will be using the ATV/Snowmobile trail on the west side – this trail may be used for skidding, but not for hauling. Log trucks would not be safe on this narrow trail with some steep ditches. The sale is a clearcut, so new landings can be made on the north and east sides (with approval from DNR and Town of Komensky).
5. **ATV/Snowmobile trails must be kept in safe, useable condition when open for public use.**
6. All pine products cut between March 1 and August 30 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed before March 15.
7. Slash must be evenly lopped/scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury seedlings or saplings with slash.

General Requirements:

1. All designated tree species must be cut and forwarded concurrently with the sale.
2. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
3. Do not cut or knock down any dead or hollow trees. These are important wildlife habitat. Any that must be cut shall be left in big pieces on the forest floor.
4. **Utilization:** cut and use all designated trees with one or more 100” sticks to a 4” top diameter.
5. Notify the DNR forester before you start the job, and each time you pull out or return to the job.
6. Any new roads and all landings must be approved by a DNR forester before operations begin.
7. Any berms removed during harvesting operations must be put back to the satisfaction of the DNR Forester.
8. Any trees cut or pushed over for new roads or landings must be utilized or cleaned up to the DNR Forester’s satisfaction.
9. Contact the town of Komensky prior to beginning logging operations at: 715-299-0093.
10. **Wisconsin’s Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! This involves brushing away all dirt and cleaning air intakes of debris.**

BLACK RIVER STATE FOREST
 TIMBER SALE MAP
 T22N-R3W Sec 12
 TRACT #1-17 Campground Corner

Sale Size: 81 acres
