

BRSF Tract 5-17

Spider's Web

T22N-R3W Sec 1

Sale size: 97 Acres
Contract Period: 2 years

Estimated Volume

<u>Species</u>	<u>Cord Equivalent</u>	<u>Tons</u>	<u>Advertised Value/Ton</u>
Red Pine*	(1110)	2500	\$17.40
Mixed Hwd**	(100)	225	\$ 7.60
Oak ⁺	(60)	165	\$ 6.30

* Includes approx. 200 MBF sawlog volume and < 5 cords white pine. Avg. dbh = 10 inches.

** Includes approx. 85% red maple, 7% aspen, 7% birch and 1% cherry.

⁺ Includes approx. 15 MBF sawlog volume.

Estimated Price for Entire Sale = \$ 46,249.50

Purpose of Sale: To thin a red pine stand for the fourth time and to regenerate an oak and maple stand. One small area of the red pine plantation will be clearcut to release the understory trees.

Special Operating Requirements and Slash Disposal:

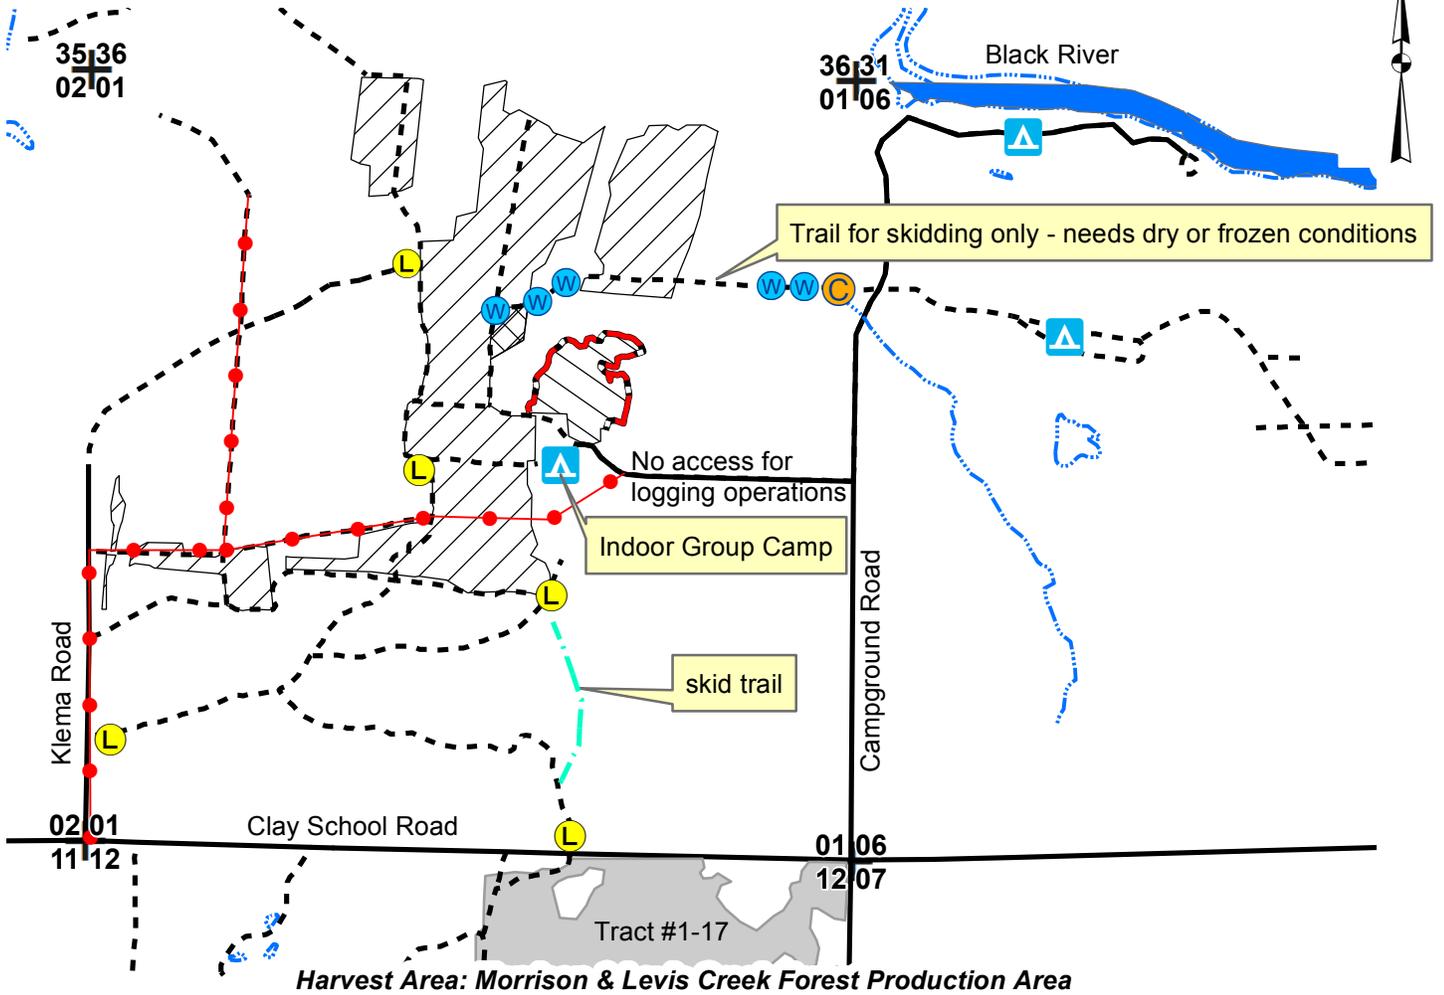

1. This sale is located mainly on dry ground, but has poor access for trucking. Some wet areas in trails will limit skidding to dry or frozen conditions.
2. The DNR Forester will work with the contractor to add east-west skid trails through the northern part of the plantation if needed. This will help avoid wet areas and shorten skid length.
3. There is an **overhead powerline** running through the southern part of the sale area. Make sure all workers are aware of where this is – it is a low line and would be easy to hit with logging equipment and trucks.
4. The sale boundaries are red paint lines, edges of pine plantations and woods trails. Do not fell trees across paint lines and do not cut painted boundary trees.
5. No biomass harvesting is allowed on this sale due to poor soil fertility.
6. All pine products cut between March 1st and August 30 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed before March 15th.
7. The Indoor Group Camp is located very near to the sale area. No landing wood, parking trailers or vehicles in the field north of the group camp. This area is part of the campground area. Skidding will be limited to the northern most edge of the field for the oak and maple area.
8. Slash must be evenly lopped/scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury seedlings or saplings with slash.

General Requirements:

1. All designated tree species must be cut and forwarded concurrently with the sale.
2. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
3. Do not cut or knock down any dead or hollow trees. These are important wildlife habitat. Any that must be cut shall be left in big pieces on the forest floor.
4. **Utilization:** cut and use all designated trees with one or more 100" sticks to a 4" top diameter.
5. Notify the DNR forester before you start the job, and each time you pull out or return to the job.
6. Any new roads and all landings must be approved by a DNR forester before operations begin.
7. Any berms removed during harvesting operations must be put back to the satisfaction of the DNR Forester.
8. Any trees cut or pushed over for new roads or landings must be utilized or cleaned up to the DNR Forester's satisfaction.
9. Contact the town of Komensky prior to beginning logging operations at: 715-299-0093.
10. **Wisconsin's Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! This involves brushing away all dirt and cleaning air intakes of debris.**

BLACK RIVER STATE FOREST
 TIMBER SALE MAP
 T22N-R3W Sec1
 TRACT #5-17 Spider's Web

Sale Size: 97 acres
 Map Scale: 1" = 1/4 mile

Red pine thinning - cut all trees marked with orange paint. 87 acres

Red pine clearcut - cut all red pine trees. 2 acres

Oak and Maple harvest - cut all trees except white pine and those marked with purple paint. Some small areas of wet ground are located within the stand and need extra care to prevent rutting. 8 acres

Skidding along north edge of field only - no use of asphalt road. Take care not to damage wood shed.
