BRSF Tract 1-13
Old 54 Jack Pine
T22N_R2W_Sec 7,18

Sale size: 77 Acres
Contract Period: 2 years

Estimated Volume

Species	Cords	Advertised Value / Unit
Jack Pine	925	$23.80
Maple*	200	$17.00
White Pine **	120	$18.90
Aspen	115	$12.60
Oak +	85	$15.70

* Includes approx. 30 cords white birch volume
** Includes approx. 20 cords red pine and 5 cords tamarack
\+ Includes approx. 6 MBF sawlog volume

Estimated Price for Entire Sale = $30,466.50

Purpose of Sale:

The objective of the sale is to regenerate jack pine and associated species while releasing the white pine.

Special Operating Requirements and Slash Disposal:

1. This sale will require dry or frozen ground to prevent rutting. A small area of the sale must be accessed across a short stretch of wetland. A good portion of the sale is dry year-round.
2. The sale boundaries are red paint line, town roads, railroad and a short section along an old homestead. Do not cut boundary trees.
3. No biomass harvesting is allowed on this sale, as we want to retain the jack pine seed for regeneration.
4. All pine products cut between March 1st and August 30 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed before March 15th.
5. Slash must be evenly lopped / scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury any pine seedlings or saplings with slash.
6. All designated tree species must be cut and forwarded concurrently with the sale.
7. The ATV/Snowmobile trail is not to be used by logging equipment for this timber sale.

General Requirements:

1. All landings must be approved by a DNR forester before operations begin.
2. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
3. Do not cut or knock down any dead or hollow trees. These are important wildlife habitat.
4. Utilization: Pulpwood - cut all designated trees with one or more 100" sticks to a 4" top diameter. Sawlogs – cut all designated trees with one or more 8'6" logs to a top diameter of 10" for hardwoods and 9" for softwoods.
5. Care should be exercised to not damage residual trees.
6. Notify the DNR forester before you start the job, and each time you pull out or return to the job.
7. Any berms removed must be put back upon completion of the sale.
8. Contact the town of Komensky prior to beginning logging operations at: 715-299-0093
9. **Wisconsin's Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! This involves brushing away all dirt and cleaning air intakes of debris.**

Woods Road

ATV/Snowmobile Trail

Mapped & Cruised by Boice & Wyss

BRSF Tract 2-13
Choking Pollen Pine
T21N_R4W_Sec 35, 36

Sale size: 104 Acres
Contract Period: 2 years

Estimated Volume

Species	Cords	Advertised Value / Unit
Red Pine*	1130	$ 44.60

* Includes approx.10 cords jack pine and aspen pulp.

Estimated Price for Entire Sale = $ 50,398.00

Purpose of Sale:

The objective of the sale is to thin the red pine stands for a second time and to salvage small areas of pine pocket decline.

Special Operating Requirements and Slash Disposal:

1. No biomass harvesting is allowed on this sale due to soil restrictions.
2. All pine products cut between March 1st and August 30 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed before March 15th.
3. Slash must be evenly lopped / scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury any pine seedlings or saplings with slash.
4. All designated tree species must be cut and forwarded concurrently with the sale.
5. This sale borders private land on the south end. Do not cross the property line with equipment, cut any blue painted trees, or put any slash across the line. The woods road is the boundary until it turns north, then there is a blue paint line.
6. The ATV/Snowmobile trail is very sandy, so no hauling will be allowed. The wood will need to be forwarded back to the woods road for landing and hauling. The ATV/Snowmobile trail must be kept open and in useable condition and may not be plowed to bare dirt in winter conditions.
7. Access into the far eastern parcels (7 acres) involves some short stretches of low, wet ground. Dry or frozen ground, or adequate brushing by equipment to prevent rutting will be required in these areas. The remainder of the sale is dry, but does border wetlands in places.

General Requirements:

1. All landings must be approved by a DNR forester before operations begin.
2. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
3. Do not cut or knock down any dead or hollow trees. These are important wildlife habitat.
4. Utilization: Pulpwood - cut all designated trees with one or more 100" sticks to a 4" top diameter. Sawlogs – cut all designated trees with one or more 8'6" logs to a top diameter of 10" for hardwoods and 9" for softwoods.
5. Care should be exercised to not damage residual trees.
6. Notify the DNR forester before you start the job, and each time you pull out or return to the job.
7. Any berms removed must be put back upon completion of the sale.
8. Wisconsin's Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! This involves brushing away all dirt and cleaning air intakes of debris. **This site has quite a bit of buckthorn in the southern and far eastern portions. Care must be taken to not spread it to new sites.**

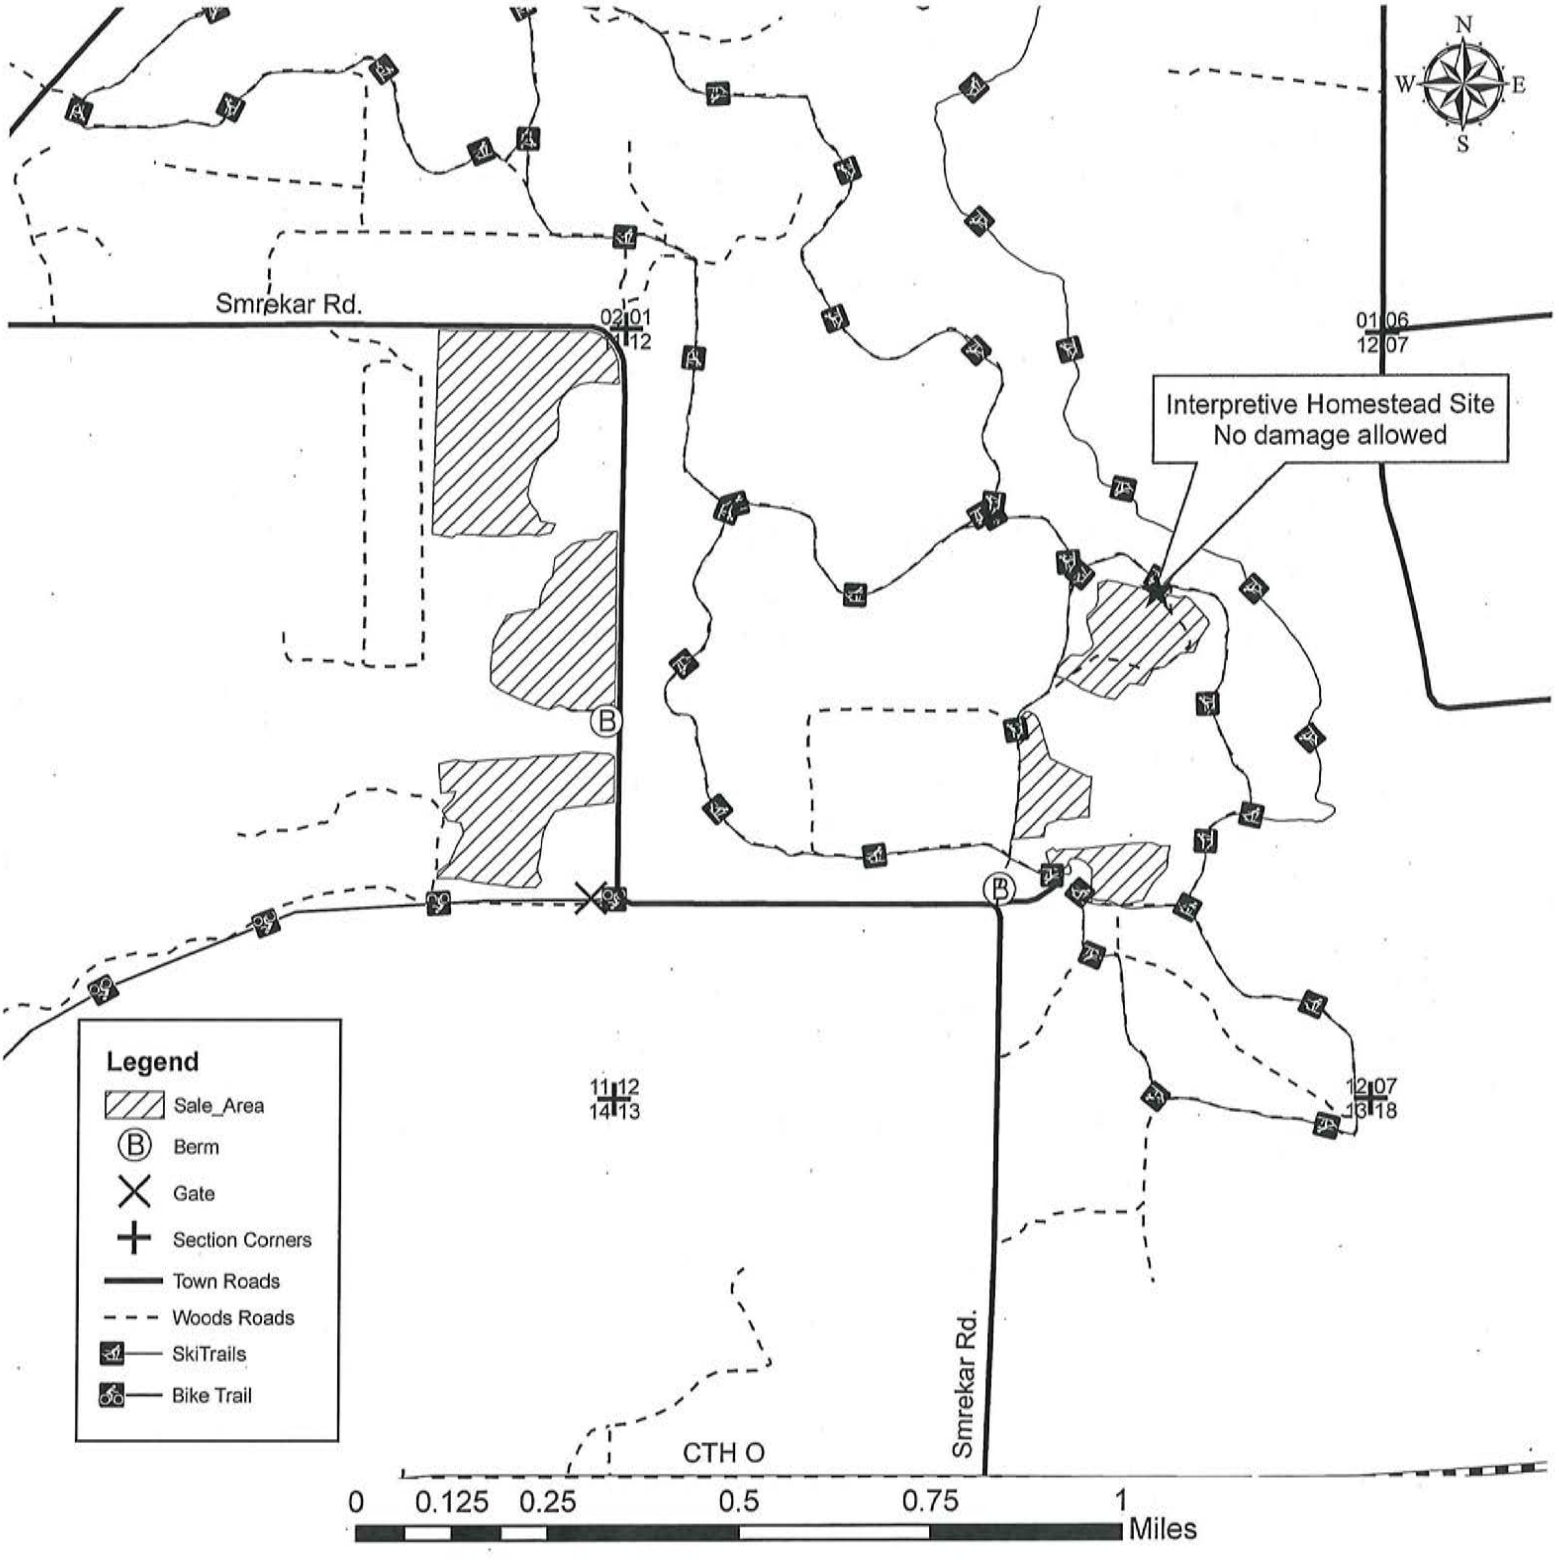
TRACT # 4-13, Smrekar Red Pine - 85 acres

Select Harvest Area - Harvest all orange marked trees. Use any which contain one 100" stick to a 4" top diameter. Do not cut or damage unmarked red pine, white pine, oak, and maple.

Ski trails are not to be used for hauling. Skidding will be allowed only on approved areas and damage must be kept to a minimum. The ski trails must be level and returned to their original condition immediately upon completion of any given area. Operation during winter will need to be pre-authorized in order to minimize impact on recreational users of the ski trail.



BRSF Tract 4-13
Smrekar Red Pine
T20N_R2W_Sec. 11, 12

Sale size: 85 Acres
Contract Period: 2 years

Estimated Volume

Species	Cords	Advertised Value / Unit
Red Pine*	1150	$ 45.90
Oak	15	$ 16.20

* Includes approx. 20 cords jack pine and 5 cords white pine, also includes 250 MBF sawlogs

---

Estimated Price for Entire Sale = $ 53,028.00

Purpose of Sale:

The objectives of the sale are to reduce the basal area from current conditions to an average between 100 and 110 sq. ft. in the red pine stands to release the crowns of the remaining trees on at least two sides.

Special Operating Requirements and Slash Disposal:

1. Cut all trees marked with orange paint. Use any which contain one 100" stick to a 4" top diameter. All other trees are to remain intact and undamaged.
2. No rutting will be allowed.
3. No biomass harvesting is allowed on this sale due to nutrient poor soil restrictions.
4. All pine products cut between March 1st and August 30 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed before March 15th.
5. Slash must be evenly lopped / scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury any pine seedlings or saplings with slash.
6. All designated tree species must be cut and forwarded concurrently with the sale. All harvested trees must be cut to product length at the stump, no whole tree skidding will be allowed.
7. **Ski trails are not to be used for hauling. Skidding will be allowed only on approved areas and damage must be kept to a minimum. The ski trails must be level and returned to their original condition immediately upon completion of any given area. Operation during winter will need to be pre-authorized in order to minimize impact on recreational users of the ski trail.**
8. The interpretive site located in the northern most stand on the Smrekar Ski trails **must not be damaged!** Caution must be used when operating around this site.

General Requirements:

1. All landings must be approved by a DNR forester before operations begin.
2. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
3. **Do not cut or knock down** any dead or hollow trees. These are important wildlife habitat.
4. Utilization: Pulpwood - cut all designated trees with one or more 100" sticks to a 4" top diameter. Sawlogs – cut all designated trees with one or more 8'6" logs to a top diameter of 10" for hardwoods and 9" for softwoods.
5. Care should be exercised to not damage residual trees.
6. Notify the DNR forester before you start the job, and each time you pull out or return to the job.
7. Any berms removed must be put back upon completion of the sale.
8. The Township of Millston (phone # 715-284-0913) must be notified prior to sale start-up.
9. **Wisconsin's Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! This involves brushing away all dirt and cleaning air intakes of debris.**

Mapped & Cruised
by J. Boice & J. Wyss

BRSF Tract 6-13
Timberdoodle Pine
T20N_R2W_Sec 16, 17

Sale size: 174 Acres
Contract Period: 2 years

Estimated Volume

Species	Cords	Advertised Value / Unit
White Pine*	950	$35.10
Oak**	400	$21.30
Jack Pine	360	$32.10
Maple	260	$23.00
Aspen	25	$16.20

* Includes approx. 30 cords red pine volume and 190 MBF white pine volume
** Includes approx. 4 MBF sawlog volume

Estimated Price for Entire Sale = $ 59,806.00

Purpose of Sale:

The objective of the sale is to thin the white pine stand while harvesting the mature trees, regenerate the mature jack pine stand and to release the young jack pine stand from overtopping, poor quality white pine.

Special Operating Requirements and Slash Disposal:

1. There are no seasonal restrictions on harvesting operations on this timber sale. The majority of the sale is on dry ground, with only a few small wetland areas located within Area 1. Operators should avoid these areas, unless conditions allow for no rutting. The areas are small enough that they can be brushed to access any trees that need to be harvested. The DNR forester may allow these areas to be left uncut in order to prevent rutting.
2. The sale boundaries are red paint line, ATV/Snowmobile trail, town roads, and a short section of red pine plantation on the south end. Do not cut boundary trees.
3. No biomass harvesting is allowed on this sale due to soil restrictions.
4. All pine products cut between March 1st and August 30 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed before March 15th.
5. Slash must be evenly lopped / scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury any pine seedlings or saplings with slash.
6. All designated tree species must be cut and forwarded concurrently with the sale.
7. The ATV/Snowmobile trail is not to be used by logging equipment for this timber sale. There is adequate access on other woods trails throughout the harvest area.
8. No logging activities allowed on Saturdays and Sundays in Area One between Memorial Day Weekend and Labor Day Weekend to limit noise impacts on campers at Pigeon Creek Campground.

General Requirements:

1. All landings must be approved by a DNR forester before operations begin.
2. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
3. Do not cut or knock down any dead or hollow trees. These are important wildlife habitat.
4. Utilization: Pulpwood - cut all designated trees with one or more 100" sticks to a 4" top diameter. Sawlogs – cut all designated trees with one or more 8'6" logs to a top diameter of 10" for hardwoods and 9" for softwoods.
5. Care should be exercised to not damage residual trees.
6. Notify the DNR forester before you start the job, and each time you pull out or return to the job.
7. Any berms removed must be put back upon completion of the sale.
8. Contact the town of Millston prior to beginning logging operations at: 715-284-0913
9. **Wisconsin's Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! This involves brushing away all dirt and cleaning air intakes of debris.**
