- Private Lands

The objectives for the Vilas Sandy Plains Central Forest Production Area are to increase red and white pine as a dominant community type and maintain sites with oak, aspen and white birch.

The Red Pine Area, in stand 5, is an overstocked 13 acre 31 year old red pine plantation which has never been thinned. At this time a row thinning cut, where every third row is harvested, is being established to promote better stand health and vigor with additional light, space and growing conditions.

The location of the proposed timber sale is south of Hwy N & Hwy G with direct access to the plantation west of Hwy G. A snowmobile trail is located on the southeast side of the proposed timber sale. The snowmobile trail will be maintained in a rideable fashion and signed for user safety, if harvesting takes place in the winter. Aesthetics will be maintained with a residual stocking of red pine. Biomass Harvesting is not allowed on this sale area.
