SPOTLIGHT

DNR Study Shows Green Bay Area Trees Provide \$6M per year in Benefits
 Study conducted using iTree Streets calculated the values of trees in property values, storm water runoff, CO2 reduction, air quality, and energy savings in the Green Bay Metro area. After the value of tree benefits were calculated, graphic factsheets were created to capture the attention of elected officials. Check out the fact sheets below

IN THE NEWS

“Why Trees Matter” by Jim Robbins

A moving opinion article outlining human instinct of taking trees for granted, and how trees are essential to the our survival. [Read more](#)

How to Spot Income Inequality from Space? Count the Trees?

A correlation was found between income per capita and demand for forest cover. Images show evidence of spotting income inequality in relation to tree canopy. [Read more](#)

Green cities keep the doctor away

Columbia university conducted a study correlating the number of street trees and the incidence of disease. Findings show that adding an additional 343 trees per square kilometer decreases child asthma rates by 24-29 percent. [Read more](#)

“No borers- - - so far in Rock County”

The state of Wisconsin sent two specialists to search for EAB along the Rock/ Walworth counties on Wednesday. [Read more](#)

SPECIFICALLY WISCONSIN

Firewood rule remains to fight Emerald Ash Borer

Wisconsin Department of Agriculture Trade and Consumer Protection (DATCP) released a statement that they would not be joining the federal government in the loosening of quarantine regulations. [Read more](#) Official DATCP News Release. [Read more](#)

EAB Confirmed in Walworth County

An adult was collected Thursday, June 7th roughly 10 miles southwest of Lake Geneva and half mile north of the Illinois state border. [News release](#)

EAB Confirmed in Waukesha County

An adult was collected Tuesday, June 19th in the Village of Mukwonago. [News release](#)

EAB Confirmed in Green Bay

On Friday, June 8th, an adult ash borer was confirmed. Infested trees were found in close proximity to where the adult was discovered in July, 2009 near the Wisconsin Public Service headquarters in downtown Green Bay.

EAB

Don't Move Firewood

This is a wonderful community outreach [website](#) to share. Some of the videos on this site are hilarious, a couple of my favorites related to EAB are: [Life cycle of EAB](#) and [EAB & Battle of the Trees](#)

Chicago Alderman warn: Treat ash or risk losing nearly 100,000 trees

Due to city budget cutback the treatment of ash has declined, and the city is heading to a point of losing its urban canopy. [Read more](#)

Minnesota Department of Agriculture has a new tool to track EAB using cadavers

Male borers are out on the prowl for their female counterparts during the summer. When they discover a lady they come over to introduce themselves, Minnesota plans to take advantage of this behavior and trap the male beetles for surveillance. [Read more](#)

EAB Treatments

Due to the spread of EAB the UW-Extension is posting publication on the recommended treatments for commercial pesticide applicators

[Insecticide Options for Protecting Ash Trees from Emerald Ash Borer](#)

[Professional Guide to Emerald Ash Borer Insecticide Treatments](#)

Reporting suspected EAB

Municipal staff, professional arborists/foresters and the public: send all suspected reports to the EAB Hotline 1-800-462-2803, email to eab@datcp.state.wi.us, and refer to [WI reporting webpage](#).

TOOLS & RESOURCES

Owner's Manual - Natural Resources Stewardship for Homeowners Associations

Chapter one of the HOA Manual outlines the benefits and management of landscape trees. Many HOA decision makers are placed in charge of natural resources that they have little to no experience with, this provides them with a comprehensive model. [Read more](#)

DNR Northern Region Forest Insect & Disease Report

Brian Schwingle reports on the latest forest insects that he has encountered this spring. [Read more](#)

Imprelis Herbicide Injury and Recovery

Purdue Plant & Pest Diagnostic Laboratory addresses some of the questions asked about the recovery of trees to Imprelis injury. [Read more](#)

University of North Carolina Plaza trees receive 700 cubic feet of soil per tree

Silva Cells are incorporated into the site plans to expand rooting volume for plaza trees under pavement. [Read more](#)

ABOUT THE INSIDER

The *Wisconsin Urban Forestry Insider* is an electronic news bulletin produced by the Urban and Community Forestry program of the Wisconsin Department of Natural Resources, in Madison, Wisconsin. The *Insider* is intended as a quick networking tool and information source for all people actively working in the area of urban and community forestry, especially in the state of Wisconsin. Items that cannot wait for our print/electronic newsletter, [Wisconsin Urban & Community Forests](#), will appear here.

Because the *Insider* connects to numerous outside sources it is typical for links **not** to be maintained for extended periods of time. All URLs are working on the date of distribution.

We are happy to accept your article suggestions and contributions. Send them to the editor, at

Elizabeth.Dierickx@wisconsin.gov or call her at (608) 264-8944.

Past and current issues of the *Insider* can be viewed at dnr.wi.gov, keyword “Insider” or go to <http://dnr.wi.gov/topic/UrbanForests/newsletters.html>.
