Review of Regulated Activities under s. 281, Wis. Stats.

Wetland Activity Requires an IP

Practicable Alternatives Analysis (PAA)
Considering PAs that avoid wetland impacts, the proposed project represents the least damaging PA*

Yes

All Practicable measures to minimize adverse impacts to wetland functional values will be taken

No

Yes

Considering direct, cumulative, secondary and mitigation impacts to wetland functional values and net positive or negative environmental project impacts:
Project will result in no significant adverse impacts to wetland functional values, water quality of other environmental

No

Yes

Project meets standards

Project does not meet standards

* For projects with demonstrable economic public benefits, expansion of an existing industrial, commercial or agricultural facility or in an existing industrial park, PAA is limited to those PAs at the site or adjacent to the proposed discharge.
