**Project Description**

A "Natural body of water" is defined in Wisconsin law as any spring, stream, pond, lake or wetland that was historically present in a natural state but may have been physically altered over time except any waterbody that has been permitted by the Department under Ch. 30 or 31, Wis. Stats. or NR 299 Water Quality Certification and not declared public under s. 30.19(5), Stats. A freeze-out pond is defined in Wisconsin law as a natural, self-contained body of water in which freezing or anoxic conditions prevent the body of water from naturally sustaining a fish population at least twice every 5 years.
