Project Description

A "natural body of water" is defined in Wisconsin law as any spring, stream, pond, lake or wetland that was historically present in a natural state but may have been physically altered over time. A "freeze-out pond" is defined in Wisconsin law as a natural, self-contained body of water in which freezing or anoxic conditions prevent the body of water from naturally sustaining a fish population at least twice every 5 years.

Operating a fish farm in a Natural Body of Water requires a permit under NR 19, Wis. Adm. Code. I am applying for:

- NR 19 Permit Renewal** - for continued use of a natural waterbody that was previously permitted as a preexisting fish rearing facility or a freeze-out pond.
- Initial NR 19 Permit** - for new use of a natural waterbody for fish farming (note, the waterbody must be a freeze-out pond).
- Transfer of NR 19 Permit** - to convey an existing NR 19 permit from one party to another, as a result of change in ownership or leasehold interest of a fish farm.

4. Diagram showing number and dimensions of all ponds, raceways, tanks or other waterbodies to be used for fish farming.
