

## Bid Form

### Wisconsin Department of Natural Resources, Walleye Requests, October 2013

Please fill out the contact information below and the delivered price for any lake(s) you want to stock with six inch or larger walleye. Note that this form is three pages, the contact information, waterbodies to bid on, and bid specifications. Questions should be directed to David Giebtrock, phone 608-266-8229 or [David.Giebtrock@Wisconsin.gov](mailto:David.Giebtrock@Wisconsin.gov). The form should be sent to David Giebtrock at the email listed above, by fax 608-266-2244, or by mail at 101 S. Webster St., Box 7921, Madison Wisconsin 53707-7921. All bids received will be evaluated at noon, October 8<sup>th</sup>, 2013. Bids received after that time will be awarded if a body of water has not received a bid on a first come first served basis.

## Bid Specifications- purchase of large fingerling walleye from Private Fish Hatcheries by the Wisconsin Department of Natural Resources, October 2, 2013

Bids are for walleye fingerlings that are six inches or greater in length and are from the 2013 year class.

Fish must have a valid fish health certificate, form AH-AQ-2803, or a Health Certificate that meets ATCP Chapter 10 requirements. This form must be received by David Giebtbrock, Statewide Fish Production Manager, Wisconsin DNR, 101 S. Webster St. Madison, WI. Email: David.Giebtbrock@Wisconsin.gov, Phone 608-266-8229 or Fax: 608-266-2244 at least 3 *business days prior to stocking* to verify the health of the fish intended for stocking.

The fish stocked under this contract will be free of active disease and mortality. Best management practices during harvest, transportation and stocking will be used by the fish farmer as described in "Best Management Practices for Aquaculture in Wisconsin and the Great Lakes Region" August 2005, edited by Jeffrey A. Malison and Christopher F. Hartleb. Sea Grant Institute, Board of Regents, University of Wisconsin System. If the Department representative observes signs of active disease or mortality, the Department will reject the load.

A Department representative will meet the stocking truck at the stocking location and take twenty-five fish off the truck to verify the length requirement and actual stocking of fish. These twenty-five fish will count against the stocking request and the Farmer will be paid for them. The Department reserves the right to reject loads that contain fish that are less than six inches in length.

The Fish Farmer and a Department representative will observe the fish in the immediate area of release for a period of ½ hour after their release. Mortalities shall be removed and subtracted from the number reported as stocked. If, after ½ hour, any fish remain lethargic, their number will be subtracted from the number of fish reported as stocked.

Fish must be delivered before December 1<sup>st</sup>, 2013.
