

Public Notice – Boland Valley Creek, Buffalo County, WI
Date – 08/31/2015

Pursuant to NR 1.02(7)(c), Wis. Adm. Code, the Department of Natural Resources gives public notice of the classification of the entire length, 5.2 miles, of Boland Valley Creek in Buffalo County as a Class II Trout water.

Boland Valley Creek is a 5.2 mile tributary of the Trempealeau River that originates in Sec. 16, T21NR10W, Buffalo County, and flows generally south to its mouth at the Trempealeau River in Sec. 2, T20NR10W, Buffalo County.

This classification is based upon a survey which indicates this portion of stream contains a population of brook trout made up of one or more age groups, above the age of one year, in sufficient numbers to indicate substantial survival from one year to the next, and has some natural reproduction occurring; however, stocking is necessary to fully utilize the available trout habitat and sustain the fishery.

The Department shall waive any hearing requirement on this classification unless a written request for hearing is received within 30 days after publication of this public notice. Requests should be sent to Daniel C. Hatleli, Fish Biologist, 910 Highway 54 East, Black River Falls, WI 54615.

WBIC # 1775700

Public Notice – Eagle Creek, Buffalo County, WI
Date – 08/31/2015

Pursuant to NR 1.02(7)(c), Wis. Adm. Code, the Department of Natural Resources gives public notice of the classification of 9.3 miles of Eagle Creek, in Buffalo County, as a Class II Trout water.

Eagle Creek is a 17.6 mile tributary of Waumandee Creek that originates in Sec. 30, T21NR10W, Buffalo Co. The proposed Class II trout water then flows generally south to southwest for 9.3 miles to the County Highway G road crossing located in the northwest quarter of the southwest quarter of Sec. 33, T20NR11W, Buffalo Co.

This classification is based upon a survey which indicates this portion of stream contains a population of brook trout made up of one or more age groups, above the age of one year, in sufficient numbers to indicate substantial survival from one year to the next, and has some natural reproduction occurring; however, stocking is necessary to fully utilize the available trout habitat and sustain the fishery.

The Department shall waive any hearing requirement on this classification unless a written request for hearing is received within 30 days after publication of this public notice. Requests should be sent to Daniel C. Hatleli, Fish Biologist, 910 Highway 54 East, Black River Falls, WI 54615.

**Public Notice – Elk (Bennett) Creek, Buffalo and Trempealeau Counties, WI
Date – 08/31/2015**

Pursuant to NR 1.02(7)(c), Wis. Adm. Code, the Department of Natural Resources gives public notice of the classification of the entire 16.5 miles of Elk (Bennett) Creek, in Buffalo and Trempealeau County, as a Class II Trout water.

Elk (Bennett) Creek is a 16.5 mile tributary of the Buffalo River that originates in Sec. 5, T23NR9W, Trempealeau Co. The proposed Class II trout water then flows generally west for 16.5 miles to the mouth at the Buffalo River in Sec. 16, T23NR11W, Buffalo Co.

This classification is based upon a survey which indicates this portion of stream contains a population of brook trout made up of one or more age groups, above the age of one year, in sufficient numbers to indicate substantial survival from one year to the next, and has some natural reproduction occurring; however, stocking is necessary to fully utilize the available trout habitat and sustain the fishery.

The Department shall waive any hearing requirement on this classification unless a written request for hearing is received within 30 days after publication of this public notice. Requests should be sent to Daniel C. Hatleli, Fish Biologist, 910 Highway 54 East, Black River Falls, WI 54615.

WBIC # 1817000

Public Notice – Little Waumandee Creek, Buffalo County, WI
Date – 08/31/2015

Pursuant to NR 1.02(7)(c), Wis. Adm. Code, the Department of Natural Resources gives public notice of the classification of the entire length, 21 miles, of Little Waumandee Creek, in Buffalo County as a Class II Trout water.

Little Waumandee Creek originates in Sec. 31, T23NR10W, Buffalo County, and flows generally southwest then south to the mouth at Waumandee Creek in Sec. 29, T21NR11W, Buffalo County.

This classification is based upon a survey which indicates this portion of stream contains a population of brook and brown trout made up of one or more age groups, above the age of one year, in sufficient numbers to indicate substantial survival from one year to the next, and has some natural reproduction occurring; however, stocking is necessary to fully utilize the available trout habitat and sustain the fishery.

The Department shall waive any hearing requirement on this classification unless a written request for hearing is received within 30 days after publication of this public notice. Requests should be sent to Daniel C. Hatleli, Fish Biologist, 910 Highway 54 East, Black River Falls, WI 54615.

WBIC # 1810300

Public Notice – Swinns Valley Creek, Buffalo County, WI
Date – 08/31/2015

Pursuant to NR 1.02(7)(c), Wis. Adm. Code, the Department of Natural Resources gives public notice of the classification of the entire length, 8.49 miles, of Swinns Valley Creek, in Buffalo County, as a Class II Trout water.

Swinns Valley Creek originates in Sec. 35, T22NR10W, Buffalo County, and the Class II water flows from the origin generally south for 8.49 miles to its mouth at the Trempealeau River in Sec. 2, T20NR10W, Buffalo County.

This classification is based upon a survey which indicates this portion of stream contains a population of brook and brown trout made up of one or more age groups, above the age of one year, in sufficient numbers to indicate substantial survival from one year to the next, and has some natural reproduction occurring; however, stocking is necessary to fully utilize the available trout habitat and sustain the fishery.

The Department shall waive any hearing requirement on this classification unless a written request for hearing is received within 30 days after publication of this public notice. Requests should be sent to Daniel C. Hatleli, Fish Biologist, 910 Highway 54 East, Black River Falls, WI 54615.

WBIC # 1776000

Public Notice – Tamarack Creek, Buffalo County, WI
Date – 08/31/2015

Pursuant to NR 1.02(7)(c), Wis. Adm. Code, the Department of Natural Resources gives public notice of the classification of the entire length, 8.77 miles, of Tamarack Creek, in Buffalo County, as a Class II Trout water.

Tamarack Creek is an 8.77 mile tributary of the Buffalo River that originates in Sec. 34, T24NR12W, Buffalo Co. The proposed Class II trout water then flows generally south to southeast for 8.77 miles to the mouth at the Buffalo River located in the northeast quarter of the northwest quarter of Sec. 36, T23NR12W, Buffalo Co.

This classification is based upon a survey which indicates this portion of stream contains a population of brook trout made up of one or more age groups, above the age of one year, in sufficient numbers to indicate substantial survival from one year to the next, and has some natural reproduction occurring; however, stocking is necessary to fully utilize the available trout habitat and sustain the fishery.

The Department shall waive any hearing requirement on this classification unless a written request for hearing is received within 30 days after publication of this public notice. Requests should be sent to Daniel C. Hatleli, Fish Biologist, 910 Highway 54 East, Black River Falls, WI 54615.

WBIC # 1816200

Public Notice – Trout Creek, Buffalo County, WI
Date – 08/31/2015

Pursuant to NR 1.02(7)(c), Wis. Adm. Code, the Department of Natural Resources gives public notice of the classification of the entire length, 8 miles, of Trout Creek, in Buffalo County, as a Class II Trout water.

Trout Creek originates in Sec. 27, T23NR13W, Buffalo County, and the Class II Trout water flows from the origin generally southeast for 8 miles to the mouth at the Buffalo River, North Channel, in Sec. 18, T22NR12W, Buffalo County.

This classification is based upon a survey which indicates this portion of stream contains a population of brook trout made up of one or more age groups, above the age of one year, in sufficient numbers to indicate substantial survival from one year to the next, and has some natural reproduction occurring; however, stocking is necessary to fully utilize the available trout habitat and sustain the fishery.

The Department shall waive any hearing requirement on this classification unless a written request for hearing is received within 30 days after publication of this public notice. Requests should be sent to Daniel C. Hatleli, Fish Biologist, 910 Highway 54 East, Black River Falls, WI 54615.

WBIC # 1815000

Public Notice – Waumandee Creek, Buffalo County, WI
Date – 08/31/2015

Pursuant to NR 1.02(7)(c), Wis. Adm. Code, the Department of Natural Resources gives public notice of the classification of 21.3 miles of Waumandee Creek in Buffalo County as a Class II Trout water.

Waumandee Creek originates in Sec. 10, T22NR10W, Buffalo County, and the Class II Trout water flows from the origin generally southwest for 21.3 miles to the Schoepps Valley Road crossing in Sec. 6, T20NR11W, Buffalo County.

This classification is based upon a survey which indicates this portion of stream contains a population of brook trout made up of one or more age groups, above the age of one year, in sufficient numbers to indicate substantial survival from one year to the next, and has some natural reproduction occurring; however, stocking is necessary to fully utilize the available trout habitat and sustain the fishery.

The Department shall waive any hearing requirement on this classification unless a written request for hearing is received within 30 days after publication of this public notice. Requests should be sent to Daniel C. Hatleli, Fish Biologist, 910 Highway 54 East, Black River Falls, WI 54615.

WBIC # 1808300

Public Notice – Traverse Valley Creek, Buffalo and Trempealeau Counties, WI

Date – 08/31/2015

Pursuant to NR 1.02(7)(c), Wis. Adm. Code, the Department of Natural Resources gives public notice of the classification of the entire length, 8.96 miles, of Traverse Valley Creek, in Buffalo and Trempealeau County as a Class II Trout water.

Traverse Valley Creek is an 8.96 mile tributary to the Trempealeau River that originates in Sec. 11, T22NR10W, Buffalo Co., and then flows generally southeasterly across the Buffalo/Trempealeau County line and thence on southeasterly to its mouth at the Trempealeau River in Sec. 35, T22NR9W, Trempealeau Co.

This classification is based upon a survey which indicates this portion of stream contains a population of brook trout made up of one or more age groups, above the age of one year, in sufficient numbers to indicate substantial survival from one year to the next, and has some natural reproduction occurring; however, stocking is necessary to fully utilize the available trout habitat and sustain the fishery.

The Department shall waive any hearing requirement on this classification unless a written request for hearing is received within 30 days after publication of this public notice. Requests should be sent to Daniel C. Hatleli, Fish Biologist, 910 Highway 54 East, Black River Falls, WI 54615.
