

Wisconsin DNR

FLOOD INSURANCE WORKSHOP

(Are you ready for BW-12?)

Rates are going up & subsidies are going away. This workshop will tell you what is changing in the NFIP, how it affects your community and what you can do to mitigate the impacts. In addition to insurance, DNR experts will discuss the flood map amendment process, mitigation solutions to rising premiums and the importance of proper permitting to prevent problems.

All community officials, surveyors, engineers, insurance and real estate agents and other professionals are encouraged to attend.

Free presentation, no registration required
