

Chapter 5: Characteristics of NSRE Participants by Activity

Tables 5-1 to 5-72 consist of characteristics for residents of the State of Wisconsin. Due to the simplicity of each table and the vast amount of information provided overall, no text is provided for the tables. This format leaves the reader the opportunity to concentrate on and interpret those findings most relevant to them and their research needs.

Percentages sum to 100 within each demographic group in the first two columns with numbers. In last column, compare stratum percent to the percent participating for all respondents in line 1. Sample sizes vary by activity because not all activities were asked in every NSRE version.

Table 5-1: Participant Characteristics, Visit a Wilderness or Primitive Area, Wisconsin

Demographic	Stratum	Percent of participants	Percent of state	Ratio (1)/(2)	Percent participating
All groups	All people age 16 & older	-	-	-	33.7
Gender	Male	50.4	49.3	1.02	35.2
	Female	49.6	50.7	0.98	32.6
Race/ethnicity	White, non-Hispanic	97.1	88.1	1.10	36.7
