

BLACK RIVER STATE FOREST
 TIMBER SALE MAP
 T21N-R2W Sec 29
 TRACT #5-16 JD Seed Tree

Sale Size: 65 acres
 Map Scale: 1" = 1/4 mile

Harvest Area: Morrison and Levis Creek Basins Forest Production Area

Oak/Pine regeneration harvest. Cut all aspen ≥ 2 " dbh. Cut all other trees ≥ 5 " dbh except red pine and an average of 4-8 large crowned oaks per acre. Cut all red pine marked with orange paint.

A few small parts of the sale are on low ground and will require dry or frozen conditions and extra care/brushing by contractor to prevent rutting.

Jack Pine	(145)	308	\$15.70
Red Maple*	(135)	307	\$10.50
Red Pine	(87)	197	\$14.90
Aspen	(33)	75	\$ 7.60
White Pine**	(33)	70	\$14.20

⁺ Includes approx. 30 MBF sawlog volume.

^{**} Includes approx. 5 MBF sawlog volume

* Includes approx. 2 MBF sawlog volume.

Estimated Price for Entire Sale = \$ 28,322.80

Purpose of Sale:

To regenerate a mixed oak, aspen and pine stand, leaving red pine and oak residual for wildlife.

Special Operating Requirements and Slash Disposal:

1. Residual trees will be all unpainted red pine trees, and an average of 4-8 oaks per acre (operator's choice on oaks). These oak trees should have large crowns, but can also include cavity trees of all sizes. More oak trees should be left in areas where there is little or no aspen or red pine present.
2. This sale is located mainly on dry ground, but there are a few low drainages within the sale area that should be avoided by the equipment operators during harvesting.
3. The sale boundaries are red paint lines and Kling Road. Do not fell trees across paint lines and do not cut painted boundary trees.
4. No biomass harvesting is allowed on this sale due to poor soil fertility.
5. All pine products cut between March 1st and August 30 must be removed from the sale area within three weeks from time of cutting. Pine products cut during the remainder of the year must be removed before March 15th.
6. Slash must be evenly lopped/scattered within the sale boundary and shall be deposited a minimum of 10 feet from the mowed right-of-way of any highway, town road, or recreational trail. Slash within 50 feet of all town roads and recreational trails must lie within 2 feet of the ground. Do not bury seedlings or saplings with slash.

General Requirements:

1. All designated tree species must be cut and forwarded concurrently with the sale.
2. All stumps shall be no higher than the stump diameter, or 10 inches, whichever is less.
3. Do not cut or knock down any dead or hollow trees. These are important wildlife habitat. Any that must be cut shall be left in big pieces on the forest floor.
4. Utilization: cut and use all designated trees with one or more 100" sticks to a 4" top diameter.
5. Notify the DNR forester before you start the job, and each time you pull out or return to the job.
6. Any new roads and all landings must be approved by a DNR forester before operations begin.
7. Any berms removed during harvesting operations must be put back to the satisfaction of the DNR Forester.
8. Any trees cut or pushed over for new roads or landings must be utilized or cleaned up to the DNR Forester's satisfaction.
9. Contact the town of Millston prior to beginning logging operations at: 715-284-0913. A free permit is required for hauling on their roads year-round.
10. **Wisconsin's Best Management Practices for Invasive Species applies – contractor must clean equipment before entering and leaving the sale area! This involves brushing away all dirt and cleaning air intakes of debris.**
