

START-UP PROCEDURE

Form A

B - Brake

- > Set Parking Brake

O - On

- > Turn Gas Valve On (Not Reserve)
- > Turn Gas Cap Vent On (Older ATV's)
- > Turn Ignition Key On

N - Neutral

- > Put Transmission in Neutral
(check neutral light or rock machine)

E - Engine

- > Set Engine Stop Switch to "On" or "Run"

C - Choke

- > If Engine is Cold, Put Choke to "On" Position
- > Start Engine According to Owners Manual
- > Once ATV Is Warmed Up, Return Choke to Normal Position (*Operating the ATV with the choke left on will result in poor engine performance and possible engine damage.*)
