VILLAGE OF BELLEVILLE	Lake Belle View and Sugar River Fishing Piers	Dane	SC	\$44,222.25	\$44,222.25	The Village proposes to construct two new fishing piers on Lake Belle View and the Sugar River. Both locations will utilize floating pier structures secured to the site with 4 galvanized steel pipes that will be driven into the lake bottom. Port-A-Pier has been contracted for the engineering, design, and implementation of both pier setups. The addition of a concrete pad (for the transition plate), installation of sidewalks, ADA parking stalls, and all other rip-rap and grading work will be done.
VILLAGE OF SIREN	Siren Crooked Lake Fishing Pier	Burnett	NO	\$20,000.00	\$20,000.00	This grant will be used to complete the pier replacement project on Crooked Lake. The pier replacement will be done in one phase with the Village Public Works crew working with the manufacturer/sales company to remove the existing pier, replace existing sidewalk to the pier, and install new pier. This work should take approximately one-week to accomplish depending on the weather and time for the cement walkway to be constructed. The footprint of the replacement will overlap with the existing sidewalk and pier placement. No tree removal or other landscaping changes will be required. <ul style="list-style-type: none"> • Remove existing pier • Install sidewalk from parking area to pier • Install 6'x80' straight out to 8'x 40' "T" shaped platform
