

Citizen Resolution # 560221

(For Hearing Officer completion)

Wolf hunting/pack breakup/degradation

Numerous studies (Journal of Animal Ecology, 2014, Toklat Pack Study, Lamar Canyon Pack Study and the Weilgus Study) all determine that larger scale wolf hunting practices leads to greater overall livestock degradation. "Killing wolves breaks up packs and smaller packs have a harder time bringing down large prey. Smaller packs are often forced to find prey that's easier to kill, such as livestock." Question: Knowing that research points to greater livestock degradation following larger scale wolf hunting practices, do you agree that targeted lethal control of problem wolves should be the protocol going forward?

Resolutions introduced at each Spring Hearing are public documents under Wisconsin's Open Records law [ss. 19.31-19.39, Wis. Stats.] and will be posted online for the public to review. Any personally identifiable information will be available to the public but will only be used by the Department for administrative purposes.

Please print typed resolution on 8 ½ X 11 white paper (one-sided) and provide the WCC County Chair with TWO COPIES at the spring hearing. Only the individual author or designated representative may present the resolution. The author or designated representative must be present at the time the resolution is introduced. No more than two resolutions may be introduced by any person during the Congress portion of the spring hearings.

Contact one of your [local WCC delegates](#) with questions or for assistance with writing your resolution.
