

# Citizen Resolution # 681921

(For Hearing Officer completion)

**Establish and implement a wolf management plan solidly based on the most current scientific knowledge before any future wolf hunt is permitted**

**The Problem: Wisconsin allowed at least 216 wolves to be killed in 60 hours, thereby exceeding the DNR's quota of 119 for non-tribal hunters by 97. The hunt was opposed by the majority of Wisconsin's citizens, all environmentalists, tribal spokespeople, and, significantly, all scientists called upon to advise the NRB. Because the state was compelled to hold the hunt, contrary to scientists' advice, during wolves' breeding season, the actual number of wolves killed likely is far higher, on account of wolves killed in utero or orphaned. The hunt's timing, the rules regulating kill methods and the quota for the hunt all were based upon an outdated 20-year-old management plan.**

**During the January 2021 NRB meeting, scientists repeatedly expressed the need to create a new management plan based on current scientific knowledge before managing a wolf hunt. The need for a scientifically accurate management plan has not been met and should be required before another wolf hunt is managed in the state.**

**BE IT RESOLVED, on April 12, 2021, that the Conservation Congress, at its annual meeting, urges the WDNR to advise the legislature to introduce an amendment to establish and implement an updated wolf management plan based on current scientific knowledge and environmentalist and tribal advice before any future wolf hunt be permitted in Wisconsin.**
