

Citizen Resolution # 130620

(For Hearing Officer completion)

Audio tape and post all taped Wisconsin Conservation Congress committee meetings on the DNR' website.

Problem: The recorded minutes of the Wisconsin Conservation Congress committee meetings do not always accurately capture expressed points of view or provide enough detailed information for review by the public in regards to the discussed topics. Sometimes, the minutes focus more on the committee member's comments than on the author's comments giving supporting testimony to their resolutions. Consequently, the level of transparency during committee meetings is diminished by the current method of documenting the minutes.

Not all authors of resolutions are able to attend committee meetings to support their resolutions. Audio taping and posting the committee meetings would provide the authors and the public with a better understanding of why citizen' resolutions were passed or rejected. It would also give the public additional insight on issues of concern throughout the state.

Resolution: Audiotape tape and post all Wisconsin Conservation Congress committee meetings on the DNR' website.
