### A. BEAVER MANAGEMENT PLAN

**DISCUSSION**

John Olson gave a brief overview of proposed plan if approved there may be an adjustment to the plan later about shortening the beaver trapping season. Weiss? How is Wildlife going to handle the research needed to review future plans? Olson/ Each bureau have been asked to list their top 10 project need. It was also mentioned that the Pittman Robinson Account is still very robust at this time. Ed Harvey stated that trappers are the only viable tool to control the beaver population. Ed also mentioned that Fur Harvest voted to support plan. The WCC needs to make sure that we work to manage this resource. This is a 10 year plan with a review in 5 years. Some additional discussion lead to a motion by Maas 2nd by Weiss to support, motion carries.

### B. WALLEYE MANAGEMENT PLAN IN CEDED AREA

**DISCUSSION**

Justine Hasz Fisheries Bureau Chief gave an overall review of the plan. The plan firm's up the emergency rule and will keep a 3 bag 15" size with one allowed between 20" and 24". You can still have a daily bag of 5 total if you go to a non-ceded lake. Weiss? Is this dependent on the extended
growth walleye always being available? Justine/ No we did have to adjust some hatcheries production
but this was only on a temporary basis. Plans are to expand production capacity to meet the future
needs and still allow for other production.

**E. UP DATE ON FUTURE ANNUAL CONVENTION FACILITIES**

**DISCUSSION**
Zimmermann reported that Chula Vista has sent the contracts; she said that she has heard about some quality issues. Due to the nature of the complaints that were discussed it was felt that another venue for the 2016 convention should be considered. This would confirm for only one year so additional consideration could be given other venues.

**ACTION**
