Kristin:

Tyco acknowledges receipt of the WDNR comments on the SOP for Surface Water Sampling. As briefly discussed this morning, Tyco has already implemented the first round of sampling and conducted the sampling activities in accordance with the submitted SOP. Although not written in the SOP, the comments provided by the WDNR were generally incorporated as standard practice during the event. Data obtained will be provided upon receipt from the laboratory and subsequent evaluation. Please let me know if you have additional questions.

Subject: Standard Operating Procedure for Surface Water Sampling - Tyco Fire Products LP site

Kristin/Conor:

Attached for your information is the planned standard operating procedure for surface water sampling in the Menominee River. The sampling is to be conducted per the request presented in

the March 21, 2016 comments on the Outfall Investigation Report for the Tyco Fire Products LP site and subsequent discussions. Tyco is currently coordinating with a contractor to supply a boat for the first round of sampling collection activities, with an anticipated start date as early as June 8 (Thursday of next week); the specific date will be provided to the agency once it is determined.
