Subject: Quarterly Progress Report (April through June 2018)  
Administrative Order on Consent (February 26, 2009)  
Tyco Fire Products LP  
Stanton Street Facility  
Marinette, Wisconsin  
WID 006 125 215

Dear Mr. Neal:

Section VI, 21, b (Page 10) of the Administrative Order on Consent (AOC), dated February 26, 2009, requires Tyco Fire Products LP (Tyco) to submit quarterly progress reports to the U.S. Environmental Protection Agency (USEPA) Region 5 and the Wisconsin Department of Natural Resources (WDNR). The reports are required to document activities conducted as part of the Resource Conservation and Recovery Act (RCRA) Corrective Actions at the Tyco facility in Marinette, Wisconsin. The enclosed report covers the period from April 1, 2018 through June 30, 2018, and presents a brief description of the work completed to date, data collected, problems encountered, and schedule of activities as required by the February 2009 AOC.

### **Work Completed During this Reporting Period**

Operation of the groundwater collection and treatment system (GWCTS) continued through the second quarter of 2018. A summary of the operational data is included as Attachment 1. The Discharge Monitoring Reports (DMRs) are included in Attachment 2.

The Semi-Annual Barrier Wall Inspection was completed on May 10, 2018 by Ryan Suennen and Jeff Danko from Tyco. The boat for the river side inspection was provided and operated by MJB industries. During the river side inspection, 3 tieback connections in the main plant area of the site were noted to have dripping water. MJB was contracted to correct the additional leaks, however high water levels in the river have prevented completion of this task. MJB had also been contracted to tighten the bolts in the general main plant area of the wall where leaks have been discovered during previous inspections. Details of the inspection are included in Attachment 3.

The Spring Barrier Wall Groundwater Monitoring Plan Update (BWGMPU) groundwater sampling event was completed the Week of April 30<sup>th</sup> 2018. Laboratory results from this event are included in Attachment 4.

The temporary dewatering system was continued in quarter 2 of 2018 under management by endpoint solutions. Progress reports are being submitted bi-weekly.

### **Additional Activities**

Tyco completed the quarterly download of data from the transducers installed in prescribed monitoring wells on June 27, 2018. Manual groundwater elevation data was obtained at each transducer location for calibration of the data at the time of the download. Manual groundwater elevation data were also collected from the former 8<sup>th</sup> Street Slip and former Salt Vault areas throughout the quarter in accordance with the pump down program requirements.

### **Data Collected**

Extraction and treatment volumes, analytical testing, and discharge data are required as part of the Wisconsin Pollutant Discharge and Elimination System (WPDES) permits obtained from WDNR for operation of the GWCTS. The GWCTS operates under permit WPDES WI-0001040-07-0. Attachment 2 includes the monthly WPDES DMRs for March 2018 through May 2018 for the GWCTS. Additional data on the operation of the GWCTS is included in Attachment 1.

The annual Vertical Barrier Wall Survey was completed on May 1, 2018. Data will be included in the 2018 annual report.

Groundwater elevation data recorded by installed transducers was downloaded on July 6, 2017 and is under evaluation. The site-wide data will be provided in the annual report.

### **Problems Encountered**

River water levels have again been high this spring, continuing a trend from last year. Late heavy snows and spring rainfall were contributing factors. On a few noted occasions in May and June, the river water level reached high enough to lap over the Vertical Barrier Wall into the wetland area of the site. This additionally contributed to increased groundwater levels in that area. The GWCT system and Phyto Plots are working to manage the groundwater load at the site. The GWCTS has been generally working a 12 hour shift on Saturday to supplement the 24/5 operation and has added waste pick-ups to help facilitate additional dewatering site-wide.

### **Schedule of Upcoming Activities**

The following is a summary of activities to be conducted during the next reporting period.

- Submit the quarterly progress report.
- Conduct 5 year review sediment sampling work.
- Complete the 3<sup>rd</sup> quarter semi-annual barrier wall and cover area inspections.
- Address inspection findings for the vertical barrier wall, cover areas, and monitoring wells.

- Complete the retrofit sealing of 3 catch basins that were noted to have structural issues during the sewer repair work in 2017 and complete comprehensive sampling.
- Complete conveyance system design and begin construction of permanent PDP conveyance system.
- Continue work on a suitable alternative to the dye test for verifying performance of the barrier wall long term.
- Continue work on 5 year review package.

**GWCTS Operation Summary**

## Groundwater Collection and Treatment System Operation

SUBJECT: Groundwater Collection and Treatment System Operation for Tyco Fire Products LP, Marinette, Wisconsin

DATE: July 16, 2018

Operation of the groundwater collection and treatment system (GWCTS) occurring from April 1, 2017 through June 30, 2017 is summarized below:

- The GWCTS operated for 15 days in April, 20 days in May, and 24 days in June, for a total of 59 days.
- Approximately 254,700 gallons of reject water was produced during system operations and subsequently disposed of off-site.
- The precipitation recorded from the weather station in Marinette, Wisconsin was 10.23 inches of rain. (<https://www.ncdc.noaa.gov/cdo-web/datasets/GHCND/stations/GHCND:USC00475091/detail>).
- An estimated total of 753,368 gallons was discharged to the Menominee River as effluent under WPDES permit.
- An estimated total of 755,864 gallons of groundwater were extracted (not including volumes extracted as part of the pump down program) from the site during the reporting period. Details of water volumes extracted from each area of the site and changes in water levels are shown in the Table 1 below.

Table 1 - Extraction Well Data Summary

| Extraction Well | Gallons Run Q2 2017<br>(4/01/2017-6/30/2017) | Gallons Run Q2 2018<br>(4/01/2018-6/30/2018) |
|-----------------|--|--|
| EW-1            | 49,797                                       | 73,423                                       |

Footnotes (DNR Use Only; Instructions for completing this form that are unique for your facility may be displayed here.)

1. Based on my inquiry of the person or persons directly responsible for managing compliance with the permit limitation for TTO I certify that to the best of my knowledge and belief no dumping of concentrated toxic organics into the wastewaters has occurred since filing of the last discharge monitoring report. I further certify that this facility is implementing the solvent management plan submitted to the department.

General Remarks

The Ground Water System (OF003) was down but, for the night shift on one day the first week of sampling so, the sample was not taken.

Footnotes (DNR Use Only; Instructions for completing this form that are unique for your facility may be displayed here.)

1. Based on my inquiry of the person or persons directly responsible for managing compliance with the permit limitation for TTO I certify that to the best of my knowledge and belief no dumping of concentrated toxic organics into the wastewaters has
2. occurred since filing of the last discharge monitoring report. I further certify that this facility is implementing the solvent management plan submitted to the department.

Without leaving THIS page, check E-Mail address for message containing Certification code. Enter code and click 'Certify' button to complete Submittal.

Submittal of this form is required by section 283.55, Wis. Stats., and chapters NR 205 and NR 214 or NR 204, Wis. Admin. Code.

Personally identifiable information collected on this form may be used for purposes other than that for which it was originally collected. Under Wisconsin's open records laws, DNR is required to provide all non-confidential information to any person who requests it. Such information may be provided to the public in written or electronic form. Information reported may be made available to the public via a DNR web page.

I certify under penalty of law that this form submitted to DNR on 6/13/2018 for the period 5/1/2018 to 5/31/2018 and identified by the DOC ID number listed above was prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Footnotes (DNR Use Only; Instructions for completing this form that are unique for your facility may be displayed here.)

1. Based on my inquiry of the person or persons directly responsible for managing compliance with the permit limitation for TTO I certify that to the best of my knowledge and belief no dumping of concentrated toxic organics into the wastewaters has  
2. occurred since filing of the last discharge monitoring report. I further certify that this facility is implementing the solvent management plan submitted to the department.

General Remarks

At OF003 outfall we did not get the sampler running on the fourth week because of issues. System was in recycle most of the week and we could not get a full 24 hour sample period.

Laboratory Quality Control Comments

**Attachment 3**  
**Barrier Wall Inspection Summary**

## **Quarter 2 Spring Vertical Barrier Wall Inspection Summary**

The 2018 Quarter 2 Vertical Barrier Wall Visual Inspection was performed by Ryan Suennen and Jeff Danko of Tyco. The inspection was completed on 5/10/18. The Inspection observations are below. There were additional small leaks located primarily again at the points of the tie back structures.

### **Observation 1**

During the river side inspection of the Barrier Wall in the main plant area of the facility, Tyco noted 2 localized instances where site groundwater was dripping from the penetrations in the wall created to support the tieback structure and 1 instance of seepage in a wall joint. The general location of the leaks were in the coal dock area of the main plant consistent with the findings on previous inspections. MJB was contracted to tighten and seal the tieback bolts in a manner consistent with previous similar work. This work will be completed in quarter 3 ideally as soon as river water levels allows for the work to be completed. Tyco will complete a follow-up inspection in the next quarter to verify the corrective actions taken continue to be effective at stopping the leaks.

## Narrative

### Job Narrative 500-145257-1

#### Comments

No additional comments.

#### Receipt

The samples were received on 5/10/2018 9:20 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 2.0° C.  
Received all three VOC vials for samples 2, 5, and 6 with headspace.

#### Revised Report

Per communication with client, the GC/MS VOA narrative has been amended to reference volatile analysis not performed within 7 days.

#### GC/MS VOA

Method(s) 8260B: The following samples were collected in properly preserved vials for analysis of volatile organic compounds (VOCs). However, the pH was outside the required criteria when verified by the laboratory, and corrective action within the 7 day holding time for unpreserved samples was not possible: MW045M (500-145257-3), MW045M (500-145257-3[MS]), MW045M (500-145257-3[MSD]) and MW041M (500-145257-4).

Method(s) 8260B: The following samples were diluted to bring the concentration of target analytes within the calibration range: MW045M (500-145257-3), MW045M (500-145257-3[MS]), MW045M (500-145257-3[MSD]), MW041S/D (500-145257-5), MW041S (500-145257-6), MW045S (500-145257-7), MW117S (500-145257-8) and MW117M (500-145257-11). Elevated reporting limits (RLs) are provided.

Method(s) 8260B: The following sample was diluted due to the abundance of non-target analytes: MW108M (500-145257-1). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

## Qualifiers

### GC/MS VOA

| Qualifier | Qualifier Description   |
|-----------|---|
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.  |
| 4         | MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable. |
| E         | Result exceeded calibration range.  |

## Glossary

| Abbreviation   | These commonly used abbreviations may or may not be present in this report.                                 |
|----------------|---|
| α              | Listed under the "D" column to designate that the result is reported on a dry weight basis                  |
| %R             | Percent Recovery  |
| CFL            | Contains Free Liquid  |
| CNF            | Contains No Free Liquid   |
| DER            | Duplicate Error Ratio (normalized absolute difference)  |
| Dil Fac        | Dilution Factor   |
| DL             | Detection Limit (DoD/DOE)   |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC            | Decision Level Concentration (Radiochemistry)   |
| EDL            | Estimated Detection Limit (Dioxin)  |
| LOD            | Limit of Detection (DoD/DOE)  |
| LOQ            | Limit of Quantitation (DoD/DOE)   |
| MDA            | Minimum Detectable Activity (Radiochemistry)  |
| MDC            | Minimum Detectable Concentration (Radiochemistry)   |
| MDL            | Method Detection Limit  |
| ML             | Minimum Level (Dioxin)  |
| NC             | Not Calculated  |
| ND             | Not Detected at the reporting limit (or MDL or EDL if shown)  |
| PQL            | Practical Quantitation Limit  |
| QC             | Quality Control   |
| RER            | Relative Error Ratio (Radiochemistry)   |
| RL             | Reporting Limit or Requested Limit (Radiochemistry)   |
| RPD            | Relative Percent Difference, a measure of the relative difference between two points                        |
| TEF            | Toxicity Equivalent Factor (Dioxin)   |
| TEQ            | Toxicity Equivalent Quotient (Dioxin)   |

| Radioactivity wasn't checked or is <math>\leq</math> background as measured by a survey meter.      | True   |         |
| The cooler's custody seal, if present, is intact.   | True   |         |
| Sample custody seals, if present, are intact.   | True   |         |
| The cooler or samples do not appear to have been compromised or tampered with.                      | True   |         |
| Samples were received on ice.   | True   |         |
| Cooler Temperature is acceptable.   | True   |         |
| Cooler Temperature is recorded.   | True   | 2.0     |
| COC is present.   | True   |         |
| COC is filled out in ink and legible.   | True   |         |
| COC is filled out with all pertinent information.   | True   |         |
| Is the Field Sampler's name present on COC?   | True   |         |
| There are no discrepancies between the containers received and the COC.                             | True   |         |
| Samples are received within Holding Time (excluding tests with immediate HTs)                       | True   |         |
| Sample containers have legible labels.  | True   |         |
| Containers are not broken or leaking.   | True   |         |
| Sample collection date/times are provided.  | True   |         |
| Appropriate sample containers are used.   | True   |         |
| Sample bottles are completely filled.   | True   |         |
| Sample Preservation Verified.   | True   |         |
| There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs                    | True   |         |
| Containers requiring zero headspace have no headspace or bubble is <math><6\text{mm}</math> (1/4"). | False  |         |
| Multiphasic samples are not present.  | True   |         |
| Samples do not require splitting or compositing.  | True   |         |
| Residual Chlorine Checked.  | N/A    |         |
