Hi Dean,

Based on Lisa's knowledge of the site and contaminant characterization, it is our opinion that additional testing is not necessary. Please make this e-mail part of the file.

Mike

Mike,

Just a quick note to summarize our telephone conversation from this morning. Based on my conversation with Jennine Cota-Trask at ARCADIS and the site file, the current characterization is adequate for disposal.

ARCADIS believes that a good portion of the soil that will be excavated for the track construction is fill material brought in after the over excavation of contaminated soils.

Lisa
