**Subject:** RE: MCABI SI Report - BRRTS: 02-38-564236

Evan,

I was able to download the file and received the hard copy last week. The closure committee met last Thursday and concurred that the Site Investigation is complete for both soil and groundwater. You can proceed with preparing the closure report. As you prepare the closure, please make the following changes to the residual soil and groundwater contamination maps:

- Modify the area of residual soil contamination above the Direct Contact RCL to include the entire property.
- Remove the PAL isoconcentration contour from the groundwater contamination map. Also, include a note on the figure's legend indicating that the arsenic contamination in groundwater is widespread throughout the general area.

If you have any questions or comments, just let me know.

Thanks,  
Dave

Hi Dave,

Below you will find an FTP link to the MCABI Site Investigation Report. If you have trouble with the FTP please do not hesitate to let me know and I will do what I can to resolve the issue. Also, please note the FTP will expire after 14 days as noted in red below. Please save the document to your server in that time for long term storage. The bound hard copy of the report should arrive to you shortly in the mail.

Have a great weekend!
